This unique collection of 55 multidisciplinary case studies is designed to help laboratory technologists and technicians "experience" how departments work together to help the physician make a diagnosis and determine the best course of treatment for the patient. In working through the comprehensive, real-world scenarios, readers deal firsthand with interpreting data from two, three or four disciplines (Blood Bank, Chemistry, Hematology, Immunology, Microbiology, Urinalysis), integrating the facts (laboratory data) from different departments and thinking critically about what they mean. Includes 55 cases--11 Blood Bank cases; 12 Chemistry cases; 10 Hematology/Coagulation cases; 5 Immunology/Serology cases; 10 Microbiology cases; 7 Urinalysis cases. Technicians and technologists who have been out of the field for awhile and are in the process of reentry into the profession and technicians and technologists who are looking for a general review of clinical laboratory science.

Sandra Smith's Review for NCLEX-PN

"For introductory courses in Public Health and US Health System/Health Policy intended for community college students and lower-division four-year students enrolled in allied health programs." An engaging, easy-to-follow introduction to US health care "The United States Health Care System: Combining Business, Health, and Delivery, " is the most readable, student-friendly overview of the US healthcare system. Written simply and informally, it focuses on breadth rather than non-essential depth, giving even inexperienced students the knowledge they need to succeed. The unique approach illuminates the realities of the business side of healthcare as well as the practicalities of the delivery of healthcare. It addresses these questions: What is this business called healthcare? How do we pay for healthcare?
