Moral Sentiments and Material Interests

Readings

The book focuses on the history, ethnography, and convoluted ethnic identity of the Karaites, an ethnoreligious group in Eastern Galicia (modern Ukraine). The small community of the Karaite Jews, a non-Talmudic Turkic-speaking minority, who had been living in Eastern Europe since the late Middle Ages, developed a unique ethnographic culture and religious tradition. The book offers the first comprehensive study of the Galician Karaite community from its earliest days until today with the main emphasis placed on the period from 1772 until 1945. Especially important is the analysis of the twentieth-century dejudaization (or Turkicization) of the community, which saved the Karaites from the horrors of the Holocaust.

New Directions for Academic Liaison Librarians

This path-breaking book addresses the economics of knowledge in universities and, in particular, asks how the changing structure of university research funding influences research behaviour. The author considers the relationship between the allocation of funds and university scientific research productivity and examines different aspects of European Union funding of university research. In particular, the impact of possible unintended consequences of university policies and priorities are studied. The author introduces an economic and historical approach to university research behaviour that allows one to evaluate the indirect consequences of the new 'competitive approach' to university behaviour and

funding. Moreover, the book presents empirical evidence supporting the hypothesis that tighter linkages between university and industry, which aim to increase the transfer of knowledge, may produce unintended negative effects. This book will be of use to scholars of the economics of innovation and the economics of knowledge.

Financialization and Strategy

Policy makers, academic administrators, scholars, and members of the public are clamoring for indicators of the value and reach of research. The question of how to quantify the impact and importance of research and scholarly output, from the publication of books and journal articles to the indexing of citations and tweets, is a critical one in predicting innovation, and in deciding what sorts of research is supported and whom is hired to carry it out. There is a wide set of data and tools available for measuring research, but they are often used in crude ways, and each have their own limitations and internal logics. *Measuring Research: What Everyone Needs to Know* will provide, for the first time, an accessible account of the methods used to gather and analyze data on research output and impact. Following a brief history of scholarly communication and its measurement -- from traditional peer review to crowdsourced review on the social web -- the book will look at the classification of knowledge and academic disciplines, the differences between citations and references, the role of peer review, national research evaluation exercises, the tools used to measure research, the many different types of measurement indicators, and how to measure interdisciplinarity. The book also addresses emerging issues within scholarly communication, including whether or not measurement promotes a "publish or perish" culture, fraud in research, or "citation cartels." It will also look at the stakeholders behind these analytical tools, the adverse effects of these quantifications, and the future of research measurement.

T. S. Eliot, Anti-Semitism, and Literary Form

Why does the academic study of international relations have limited impact on the policy community? In *New Directions for International Relations*, Mintz and Russett identify differences in methods of analysis as one cause of problematic, unreliable results. They discuss the problem and set the stage for nine chapters by diverse scholars to demonstrate innovative new developments in IR theory and creative new methods that can lay the basis for greater consensus.

Fooled by Randomness

At once both guide book and provocation, this is an indispensable companion for students and practitioners of applied theatre. It addresses all key aspects: principles, origins, politics and aesthetics in a concise and accessible style designed to appeal both to those who have recently discovered this sub-discipline and to experienced practitioners and academics. Part 1 is divided into two chapters. The first introduces the sub-discipline of Theatre for Development, covering its origins, principles and history, and providing an overview of theatre for development in Western contexts as well as in Africa, Asia, the Indian Subcontinent

and Latin America. The second focuses upon theoretical and philosophical issues confronting the discipline and its relationship to contemporary politics, as well as considering its future role. Part 2 consists of seven chapters contributed by leading figures and current practitioners from around the world and covering a diverse range of themes, methodologies and aesthetic approaches. One chapter offers a series of case studies concerned with sexual health education and HIV prevention, drawn from practitioners working in Vietnam, Papua New Guinea, Southern Africa, and China. Other chapters include studies of intercultural theatre in the Peruvian Amazon; a programme of applied theatre conducted in schools in Canterbury, New Zealand, following the 2010 earthquake; an attempt to reinvigorate a community theatre group in South Brazil; and an exchange between a Guatemalan arts collective and a Dutch youth theatre company, besides others.

Research Methods for Postgraduates

Considering the recent impact of the capital market on corporate strategy, this text analyzes, through argument and supportive case studies, how pressures from the capital bull market of the 1990s and bear market of the early 2000s, have reshaped management action and calculation in large, publicly quoted US and UK corporations. Beginning with the dissatisfaction with classical strategy and its limited engagement with the processes of financialization, the book moves on to cover three detailed company case studies (General Electric, Ford and GlaxoSmithKline) which use long run financial data and analysis of company and industry narratives to illustrate and explore key themes. The book emphasizes the importance of company and industry narrative, while also analyzing long term financial results, and helps to explain the limits of management action and the burden of expectations placed on corporate governance. Presenting financial and market information on trajectory in an accessible way, this book provides a distinctive, critical social science account of management in large UK and US corporations, and it is a valuable resource for students, scholars and researchers of business, management, political economy and non-mainstream economics. short listed for the 2007 IPEG Book Prize

Remaking Market Society

"This book is a collection of eleven essays devoted to the work of Ramon del Valle-Inclan (1866-1936). Long the recipient of critical analyses from various perspectives, Valle-Inclan's writing has nevertheless been virtually neglected in the gender-based criticism that has given rise to important studies of his contemporaries in other European literatures. This means that his diverse female characters have not been fully examined, that many scholars continue to consider him an unqualified misogynist, and that a marked effort to surmount gender constraints, present throughout his work, has not been acknowledged, much less explicated. This lack of study is intimately related to a much broader lacuna in Hispanic literature and scholarship, for the working of gender norms and their interaction with economic, religious, and political institutions inscribed in the literature of turn-of-the-century Spain have only recently begun to receive detailed study." "The essays in this volume identify, explore, and interrogate issues of gender with respect to Valle-Inclan's writing. The results offer an altered portrait of Valle-Inclan in which attitudes attributed to him are questioned and reevaluated. In

particular, studies of several strong female characters indicate that he envisioned a far more complex role for women than has formerly been recognized." "Three previously published essays were chosen to provide a grounding in work on gender and Valle-Inclan. The remaining essays were written for this volume. As an orientation for the reader and in order to assure that the collection will be of use and interest to non-Hispanists as well as specialized readers, an introduction to the collection defines the intentions of the editors, discusses the essays with respect to current criticism, and places Valle-Inclan and his writing in turn-of-the-century Spanish history and aesthetics. As a whole, the collection reads as far more than the sum of its individual essays, prompting a fuller appreciation of both Valle-Inclan and the social and cultural system to which he belongs."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Science & Public Policy

During the 1980s and early 1990s, both Australia and New Zealand extensively deregulated their economies, moving to become amongst the most liberal economies in the OECD. Shaun Goldfinch interviewed more than 180 leading policy makers in Australia and New Zealand, including former prime ministers, ministers of finance, treasurers, public servants and other policy elites, and examined primary government sources to demonstrate the reasons and processes involved in this remarkable period of economic reform. This major comparative study sheds new light on economic policy-making and change, including the role of economic ideas and the importance of institutions and policy communities. It contrasts the 'crash through' approach that characterised reform in New Zealand with the 'bargained consensus' that underpinned changes in Australia. Finally it asks the critical question, 'Has the New Zealand approach to policy change delivered better policy outcomes?'

Measuring Research

Remaking New Zealand and Australian Economic Policy

This book examines the problems, pitfalls and opportunities of different models of assessing research quality, drawing on studies from around the world. Aimed at academics, education officials and public servants, key features include an overview of the argument of whether research should be assessed and how research quality should be determined. Prometheus Assessed? offers a survey of research assessment models in the US, UK, Japan and New Zealand and includes an examination of citation analysis and comparison between the different models. Should research be assessed and what is research quality? Survey of research assessment models in US, UK, Japan and New Zealand Examination of citation analysis

Modern Measurements

Fooled by Randomness is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human

error, risk, and decision-making in a world we don't understand. The other books in the series are *The Black Swan*, *Antifragile*, *Skin in the Game*, and *The Bed of Procrustes*. *Fooled by Randomness* is the word-of-mouth sensation that will change the way you think about business and the world. Nassim Nicholas Taleb—veteran trader, renowned risk expert, polymathic scholar, erudite raconteur, and New York Times bestselling author of *The Black Swan*—has written a modern classic that turns on its head what we believe about luck and skill. This book is about luck—or more precisely, about how we perceive and deal with luck in life and business. Set against the backdrop of the most conspicuous forum in which luck is mistaken for skill—the world of trading—*Fooled by Randomness* provides captivating insight into one of the least understood factors in all our lives. Writing in an entertaining narrative style, the author tackles major intellectual issues related to the underestimation of the influence of happenstance on our lives. The book is populated with an array of characters, some of whom have grasped, in their own way, the significance of chance: the baseball legend Yogi Berra; the philosopher of knowledge Karl Popper; the ancient world's wisest man, Solon; the modern financier George Soros; and the Greek voyager Odysseus. We also meet the fictional Nero, who seems to understand the role of randomness in his professional life but falls victim to his own superstitious foolishness. However, the most recognizable character of all remains unnamed—the lucky fool who happens to be in the right place at the right time—he embodies the “survival of the least fit.” Such individuals attract devoted followers who believe in their guru's insights and methods. But no one can replicate what is obtained by chance. Are we capable of distinguishing the fortunate charlatan from the genuine visionary? Must we always try to uncover nonexistent messages in random events? It may be impossible to guard ourselves against the vagaries of the goddess Fortuna, but after reading *Fooled by Randomness* we can be a little better prepared. Named by Fortune One of the Smartest Books of All Time A Financial Times Best Business Book of the Year

Impasse of the Angels

The library in China has been transformed by rapid socioeconomic development, and the proliferation of the Internet. The issues faced by Chinese libraries and librarians are those faced by library practitioners more globally, however, China also has its own unique set of issues in the digital era, including developmental imbalance between East and West, urban and rural areas, and availability of skilled practitioners. *Chinese Librarianship in the Digital Era* is the first book on Chinese libraries responding to these issues, and more. The first part of the book places discussion in historical context, before moving on to the digital environment of the Chinese library. The book then considers the issue of digital copyright in China, and debates the core values of the Chinese library. The next three chapters cover public and academic libraries, and library consortia. Finally, the book gives a view of the future prospects for libraries in China. *Unique in focusing on digital libraries in China Provides a comprehensive overview of libraries in contemporary China Presents valuable information formerly available only in Chinese*

Causation and Counterfactuals

In *Impasse of the Angels*, Stefania Pandolfo takes the critical engagement of anthropology to its limit by presenting the relationship between observer and

observed as one of interacting equals and mutually constituting subjects. Narrating, debating, and imagining, real characters take center stage and, through their act of speech, invent a people rather than stand for it. Exploring what it means to be a subject in the historical and poetic imagination of a Moroccan society, *Impasse of the Angels* listens to dissonant and often idiosyncratic voices elaborate the fractures, wounds, and contradictions of the Maghribi postcolonial present. Passionate and lyric, ironic and tragic, it is a transformative narrative experiment traveling the boundary of ethnography and fiction.

Whaling Diplomacy

Facilitating of learning in higher education can be transformed through the use of Whole Brain® learning. Whole Brain® Learning in Higher Education argues that facilitating learning in Higher Education should undergo transformation in order to develop the full academic potential of all stakeholders following the principles of action research. Empirical data was collected from participants in a number of projects across diverse disciplines. Participants included students, academic staff, instructional designers, and professionals attending short courses at tertiary level. A number of case studies are discussed as evidence for the value of the proposed model for higher education. This title consists of seven chapters, covering: the theoretical framework, baseline study, professional development, studies in Whole Brain® application, learning material that makes a difference, multidisciplinary collaboration, and the way forward. Defines Whole Brain® learning Explains the rationale behind Whole Brain® learning Demonstrates how the model can be applied in facilitating Whole Brain® learning in order to develop the full academic potential of students

ORI Introduction to the Responsible Conduct of Research

Julius's critically acclaimed study (looking both at the detail of Eliot's deployment of anti-Semitic discourse and at the role it played in his greater literary undertaking) has provoked a reassessment of Eliot's work among poets, scholars, critics and readers, which will invigorate debate for some time to come.

The Informed Writer

Whole Brain® Learning in Higher Education

A novel about the 1994 slaughter of nearly a million Rwandans.

Ramón María Del Valle-Inclán

Neoliberalism has been one of the most hotly contested themes in academic and political debate over the last 30 years. Given the global and persistent influence of neoliberal ideas on contemporary styles of governance, social-service provision, and public policy, this intensive interest is understandable. At the same time, the use of the term has become loose, vague, and over-extended, particularly in the extensive critical literature. Rather than engage in further critique, or in the

reconstruction of the history of neoliberalism, this volume seeks to bring analytical clarity to the ongoing debate. Drawing inspiration from the work of the Hungarian economic historian, Karl Polanyi, *Remaking Market Society* combines critique, original formulations, and case studies to form an analytical framework that identifies the key instruments of neoliberal governance. These include privatization, marketization, and liberalization. The case studies examine the development of neoliberal instruments (reform of the British civil service); their refinement (reform of higher education in England and Wales); and their dissemination across national borders (EU integration policies). Rather than look back nostalgically on the post-war welfare-state settlement, in the final chapter the authors ask why the coalitions that supported that settlement broke down in the face of the neoliberal reform movement. This highly original work offers a distinctive transdisciplinary approach to political economy, and therefore is an important read for students and academics who are interested in political economy as well as social theory and political philosophy.

Improving the Environment for Learning

An indispensable reference for postgraduates, providing up to date guidance in all subject areas *Methods for Postgraduates* brings together guidance for postgraduate students on how to organise, plan and do research from an interdisciplinary perspective. In this new edition, the already wide-ranging coverage is enhanced by the addition of new chapters on social media, evaluating the research process, Kansei engineering and medical research reporting. The extensive updates also provide the latest guidance on issues relevant to postgraduates in all subject areas, from writing a proposal and securing research funds, to data analysis and the presentation of research, through to intellectual property protection and career opportunities. This thoroughly revised new edition provides: Clear and concise advice from distinguished international researchers on how to plan, organise and conduct research. New chapters explore social media in research, evaluate the research process, Kansei engineering and discuss the reporting of medical research. Check lists and diagrams throughout. Praise for the second edition: “ the most useful book any new postgraduate could ever buy.” (New Scientist) “The book certainly merits its acceptance as essential reading for postgraduates and will be valuable to anyone associated in any way with research or with presentation of technical or scientific information of any kind.”(Robotica) Like its predecessors, the third edition of *Research Methods for Postgraduates* is accessible and comprehensive, and is a must-read for any postgraduate student.

Chinese Librarianship in the Digital Era

Aimed at practitioners and students of librarianship, this book is about interesting and unusual practical projects currently being run by academic liaison librarians. It shows how liaison librarians can extend their roles beyond the established one of information literacy teaching and showcases areas in which they can engage in collaborative ventures with academic and administrative staff. Designed to excite and inspire, *New Directions for Academic Liaison Librarians* demonstrates the potential of the liaison role and emphasises the need for flexibility, imagination and initiative in those who hold these posts. Unique in concentrating on the role of the new community of academic liaison librarians *Recognises* the wider possibilities for

development open to this different new breed of information specialist Written by a practitioner in the field

Energy Research Abstracts

The Economics of Knowledge Production

‘Represents the culmination of an 18-month-long project that aims to be the definitive review of this important topic. Accompanied by a scholarly literature review, some new analysis, and a wealth of evidence and insight the report is a tour de force; a once-in-a-generation opportunity to take stock.’ – Dr Steven Hill, Head of Policy, HEFCE, LSE Impact of Social Sciences Blog ‘A must-read if you are interested in having a deeper understanding of research culture, management issues and the range of information we have on this field. It should be disseminated and discussed within institutions, disciplines and other sites of research collaboration.’ – Dr Meera Sabaratnam, Lecturer in International Relations at the School of Oriental and African Studies, University of London, LSE Impact of Social Sciences Blog Metrics evoke a mixed reaction from the research community. A commitment to using data and evidence to inform decisions makes many of us sympathetic, even enthusiastic, about the prospect of granular, real-time analysis of our own activities. Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls. Metrics hold real power: they are constitutive of values, identities and livelihoods. How to exercise that power to positive ends is the focus of this book. Using extensive evidence-gathering, analysis and consultation, the authors take a thorough look at potential uses and limitations of research metrics and indicators. They explore the use of metrics across different disciplines, assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems. Finally, they consider the negative or unintended effects of metrics on various aspects of research culture. Including an updated introduction from James Wilsdon, the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management, by funders, and in the next cycle of the Research Excellence Framework. The metric tide is certainly rising. Unlike King Canute, we have the agency and opportunity – and in this book, a serious body of evidence – to influence how it washes through higher education and research.

Prometheus Bound

The biological and psychological basis of pet therapy / animal-assisted therapy and what this means for practice “A comprehensive, scientific foundation for human-animal therapy.” (Judith Solomon) In recent years, the ancient symbiosis between humans and their pets has entered a new phase, marked by the burgeoning clinical specialty of human-animal therapy. This approach uses the relationship between humans and their (mainly) mammalian pets to support the growth of emotion regulation, social skills, and mental health in children, adolescents, and adults. But how are humans and animals able to develop close bonds at all? What

makes it possible for animals to have a therapeutic effect on humans? And how can we best use this understanding in animal-assisted therapy? In this unique book, a team of expert biologists and psychologists integrate and combine sophisticated biological and psychological knowledge to answer these questions. Together they have created a comprehensive, scientific foundation for human-animal therapy, a foundation that will facilitate the development, implementation, and evaluation of effective new interventions.

Abstracts and Abstracting

"Whaling Diplomacy is the only book that addresses all of the substantive issues relating to the conservation of whales through the International Whaling Commission (IWC). It covers the law, policy, science and philosophy at the heart of each element of the debate, discussing how it has developed, the current problems that beset it and what is necessary for the future. Together, all of the issues involved in whaling form a single crucible through which the future of conservation in international environmental law is being debated." "Students of law, politics, environmental economics and philosophy will find this book of great value for its cutting-edge relevance over the three disciplines. Policymakers will also find it of interest for the insight into one of the most controversial conservation debates of our time."--BOOK JACKET.

New Directions for International Relations

This book identifies optimal practices or "benchmarks" for creating a quality learning environment within higher education and outlines steps faculty and administrators can take to improve student learning. Author Janet Donald integrates extensive research on teaching and learning with findings from her in-depth interviews with faculty and administrators at four of America's premier research institutions. She focuses on key factors influencing learning, identifies practices and policies central to effectiveness, and offers timely and feasible solutions for meeting student learning challenges.

Attachment to Pets

A collection of important recent work on the counterfactual analysis of causation.

Murambi

The Christian religion presents itself as the way to contentment, spiritual health, and salvation. But is this really true? Dr. Wendell Watters offers a powerful argument, based on his many years of clinical experience with individuals, couples, and families, that Christianity's influence actually militates against human development in such vital areas as self-esteem, sexuality, and social interactions. The tragic end result of Christian conditioning is too often antisocial behavior, sexual dysfunction, poor psychological development, anxiety, and even major psychiatric illness. Christian indoctrination is not simply a problem affecting individuals or single families; the noxious effects of its teachings over nearly two millennia pervade society at large, even those who are not Christians, and in ways

that seriously undermine human welfare and the quality of life. Christianity's aggressive pronatalist policies have encouraged large families, despite parents' inability to cope either emotionally or financially. With this the Christian church has formulated rigid sexual roles, forbidding all practices not leading directly to conception. By actually promoting sexual ignorance and irresponsibility, Christianity has allowed the proliferation of such social ills as rape, child molestation, and pornography. In the face of so much human suffering resulting from Christian doctrine, it is imperative that health care professionals, recognizing the Christian belief system as an addictive disease, develop a religious status examination to help evaluate how notions about life derived from Christian god-talk compromise individuals' healthy functioning. In failing to determine the role of oppressive religious beliefs in mental illness, physicians and other health care workers actually promote Christianity's continued stranglehold on human happiness and self-fulfillment. Dr. Watters covers ground many Christians will find uncomfortable. For that he is to be thanked. -Theological Book Review

The Karaites of Galicia

Multidisciplinary research into cooperation and the implications for public policy, drawing on insights from economics, anthropology, biology, social psychology, and sociology.

Innovative Buddhist Women

Includes all works deriving from DOE, other related government-sponsored information and foreign nonnuclear information.

Science, Technology and Society

Combines the voices of scholars and practitioners in analysing Buddhist women's history. 26 articles document the lives of women who have set in motion changes within Buddhist societies, with analyses of issues such as gender, ethnicity, authority, and class that affect the lives of women in traditional Buddhist cultures and, increasingly, the west.

The Metric Tide

Technology, Innovation and Economic Policy

This Handbook offers a systematic review of state-of-the-art knowledge on public administration in Europe. Covering the theoretical, epistemological and practical aspects of the field, it focuses on how public administration operates and is studied in European countries. In sixty-three chapters, written by leading scholars, this Handbook considers the uniqueness of the European situation through an interdisciplinary and comparative lens, focusing on the administrative diversity which results from the multiplicity of countries, languages, schools of thought and streams of investigation across Europe. It addresses issues such as multi-level administration and governance, intensive cross country cooperation in

administrative reform policy, and public accountability under different systems. It also considers the issue of welfare service delivery, at a time of major economic and societal challenges, as well as understudied emerging issues like Islamic Public Administration and the dynamics of public sector negotiations. With contributions from key experts in Public Administration and Public Management, this cutting edge Handbook offers a significant contribution to the field of comparative public administration, policy and management.

The Palgrave Handbook of Public Administration and Management in Europe

Chapters (one each country) discuss the changing role of government in higher education since the late 1970s in 10 western European countries, Australia, and the US. Though each country is addressed through the perspectives and concerns of the particular author, an editorial framework provides point.

A Queer World

Applied Theatre: Development

Despite their changing role, abstracts remain useful in the digital world. Highly beneficial to information professionals and researchers who work and publish in different fields, this book summarizes the most important and up-to-date theory of abstracting, as well as giving advice and examples for the practice of writing different kinds of abstracts. The book discusses the length, the functions and basic structure of abstracts, outlining a new approach to informative and indicative abstracts. The abstractors' personality, their linguistic and non-linguistic knowledge and skills are also discussed with special attention. Despite the relatively large number of textbooks on the topic there is no up-to-date book on abstracting in the English language. In addition to providing a comprehensive coverage of the topic, the proposed book contains novel views - especially on informative and indicative abstracts. The discussion is based on an interdisciplinary approach, blending the methods of library and information science and linguistics.

Prometheus Assessed?

Provides a comprehensive introduction to the human, social and economic aspects of science and technology. It is broad, interdisciplinary and international, with a focus on Australia. The authors present complex issues in an accessible and engaging form. Invaluable for both students and teachers.

Playing God?

This book is a collection of chapters linked together by a logical framework aimed at exploring the modern role of the measurement science in both the technically most advanced applications and in everyday life. Provides a unique methodological approach to understanding modern measurements. Important methods and devices are presented in a synthetic and easy-to-understand way. Includes end-of-chapter

exercises and solutions

Deadly Doctrine

Since the original publication of *Playing God?* in 1996, three developments in genetic technology have moved to the center of the public conversation about the ethics of human bioengineering. Cloning, the completion of the human genome project, and, most recently, the controversy over stem cell research have all sparked lively debates among religious thinkers and the makers of public policy. In this updated edition, Ted Peters illuminates the key issues in these debates and continues to make deft connections between our questions about God and our efforts to manage technological innovations with wisdom.

The Phone Book

This compedious, cutting-edge volume offers a broad array of the most provocative gay, lesbian, bisexual, and transgender scholarship produced by the Center for Lesbian and Gay Studies (CLAGS) over the first decade (1986-1996) of its existence at the CUNY Graduate School. CLAGS has had a profound and legitimizing influence on the establishment of gay and lesbian studies as a discipline. Thousands have attended its events, featuring hundreds of scholars, activists, and cultural workers; many thousands more have lamented how they would have liked to have been there. With this book, they finally, vicariously, can be. Divided into five parts—on identities as they revolve around gender and sexuality; on the terrains of homosexual history; on mind-body relations; on laws and economics; and on policy issues related to gay youth, AIDS, and aging—*A Queer World* offers a compelling panorama of gay and lesbian life. Featuring the work, among others, of such figures as Yukiko Hanawa, Will Roscoe, Jewelle L. Gomez, Jonathan Ned Katz, Elizabeth Lapovsky Kennedy, Jeffrey Escoffier, Janice M. Irvine, Kendall Thomas, Gilbert Herdt, Vivien Ng, Douglas Crimp, Walt Odets, Serena Nanda, Cindy Patton, Michael Moon, William Byne, and Randolph Trumbach, *A Queer World* is distinctive in its focus on the social sciences and issues relating to public policy. Consisting largely of previously unpublished essays, this volume—and its companion volume *Queer Representations: Reading Lives, Reading Cultures*—is an invaluable addition to the bookshelf of anyone interested in the study of sexuality.
