Analysing Discourse

Chinese is a discourse-oriented language and the underlying mechanisms of the language involve encoding and decoding so the language can be correctly delivered and understood. To date, there has been a lack of consolidation at the discourse level such that a reference framework for understanding the language in a top-down fashion is still underdeveloped. The Routledge Handbook of Chinese Discourse Analysis is the first to showcase the latest research in the field of Chinese discourse analysis to consolidate existing findings, put the language in both theoretical and socio-functional perspectives, offer guidance and insights for further research and inspire innovative ideas for exploring the Chinese language in the discourse domain. The book is aimed at both students and scholars researching in the areas of Chinese linguistics and discourse analysis.

Security Metaphors

Previous works on Discourse Analysis and Pragmatics have either been dominantly

focused on theory or on practice without much balance and attention to both theory and analysis. The present volume seeks to strike a balance between the two closely related disciplines on the one hand, and between the study of theory in the two disciplines and on issues of methodology and application in specific areas of enquiry on the other. The book seeks to provide a cross-sectional view of scholarship in these areas, specifically from the perspective of how the intersection of theory and practice enables Nigerian scholars of Discourse Analysis and Pragmatics to understand and analyse texts that have pan-Nigerian peculiarities.

Point of View in Plays

EU Foreign Policy through the Lens of Discourse Analysis

This new volume shows how state sovereignty is more fluid and contested than is usually appreciated within both conventional and constructivist literature. Whereas previous constructivist works have investigated the temporal contingency of state sovereignty, the spatial contingency of this concept has been neglected. This book tackles this situation, showing the reader how the meaning of state sovereignty was constituted differently in the case of the intervention in Kosovo and the case of non-intervention in Algeria in the late 1990s. This essential study clearly and concisely: takes existing constructivist and poststructuralist work on state sovereignty one step further, arguing that state sovereignty not only is open to different constructions over time, but also across space probes further into the conceptual relationships between sovereignty/ intervention, arguing that legitimations of non-intervention also can be analyzed as a practice, which gives meaning and content to the concept of state sovereignty contributes to the emerging debate on the importance of 'methodology' in constructivist studies, turning the philosophical and meta-theoretical assumptions of constructivism and poststructuralism into an informed 'analytical strategy' guiding the book's empirical discourse analysis.

Adding a new introduction and two previously unpublished papers, *Discourse and Practice: New Tools for Critical Discourse Analysis* brings together van Leeuwen's methodological work on discourse analysis of the last 15 years. Discourse, van Leeuwen argues, is a resource for representation, a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented, a framework for making sense of things. And they are plural. There can be different discourses, different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts. However abstract some discourses are, discourses ultimately always represent doings, van Leeuwen argues. Doing is the foundation of knowing, and social practices are the foundation of discourses. Studying children's books, newspaper reports, brochures and other texts, as well as photographs and children's toys, van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts. Throughout the book, van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories. van Leeuwen's work has already been widely used by critical discourse analysts across the world. This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical, and critically incisive.

The Practice of Critical Discourse Analysis: an Introduction

In the first study to incorporate majority Han and minority Uyghur perspectives on ethnic relations in Xinjiang following mass violence during July 2009, David Tobin analyses how official policy shapes identity and security dynamics on China's northwest frontier. He explores how the 2009 violence unfolded and how the party-state responded to ask how official identity narratives and security policies shape practices on the ground. Combining ethnographic methodology with discourse analysis and participant-observation with in-depth interviews, Tobin examines how Han and Uyghurs interpret and reinterpret Chinese nation-building. He concludes that by treating Chinese identity as a security matter, the party-state exacerbates cycles of violence between Han and Uyghurs who increasingly understand each other as threats.

Discourse Analysis

This monograph examines the rhetorical nature and function of representations of the future in political discourse, focusing on political actors' use of hegemonic images of future "reality" to achieve their political goals. It argues that a key ideological dimension of political rhetoric lies in politicians' use of projections of the

future to legitimate policies and actions. This argument is grounded in systemic-functional and critical discourse analyses of the “Bush Doctrine,” the U.S. policy response to the September 11 terrorist attacks which sanctioned a “preemptive” military posture. By focusing on the discursive construction of the future, this project addresses a lacunae in critical discourse studies and calls attention to the crucial role that the discourse and practice of “futurology” has played in post-Cold War politics and society. It will be of value to scholars interested in the discourses of politics, the “war on terror,” U.S. national security, and futurology.

Discipline and Punish

Understanding the nature of the 'cold war' that followed World War II is now more than ever a focus of debate. "Security Metaphors" starts from the premise that political and international realities are created, sustained and unraveled in discourse. The book begins by examining the conceptual underpinnings of international relations theory, and by careful linguistic analysis shows how metaphorical discourse contributed to the beginning and ending of the dangerous competition between 'East' and 'West'. It concludes not by attributing power to language, but to the hegemonic power that can best wield it.

This volume aims to provide a new framework for the analysis of securitization processes, increasing our understanding of how security issues emerge, evolve and dissolve. Securitisation theory has become one of the key components of security studies and IR courses in recent years, and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework. To do so, it organizes securitization around three core assumptions which make the theory applicable to empirical studies: the centrality of audience, the co-dependency of agency and context and the structuring force of the *dispositif*. These assumptions are then investigated through discourse analysis, process-tracing, ethnographic research, and content analysis and discussed in relation to extensive case studies. This innovative new book will be of much interest to students of securitisation and critical security studies, as well as IR theory and sociology. Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur. He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris.

The paperback edition makes for a unique selling point as a course text.

Material Discourse – Materialist Analysis explores the entanglement of material realities and discourse and shows how a materialist discourse analysis can be put into practice. A cognate concern for language and discourse, as well as well as materiality and materialism can look back on a long tradition in the Social Sciences and Humanities. This book makes their relation an explicit focus. Located at the intersections of materialism and Discourse Studies, it highlights the materiality of discourse and the entanglement of matter and meaning. The essays collected in

The book brings together theoretical and empirical contributions from a whole range of disciplines, fields, and academic contexts in a truly transdisciplinary and global manner. Material Discourse – Materialist Analysis is a timely intervention into the ongoing debates revolving around materiality, materialism, discourse, and language, as well as the intricate relations between them.

International Security Studies (ISS) has changed and diversified in many ways since 1945. This book provides the first intellectual history of the development of the subject in that period. It explains how ISS evolved from an initial concern with the strategic consequences of superpower rivalry and nuclear weapons, to its current diversity in which environmental, economic, human and other securities sit alongside military security, and in which approaches ranging from traditional Realist analysis to Feminism and Post-colonialism are in play. It sets out the driving forces that shaped debates in ISS, shows what makes ISS a single conversation

State Sovereignty and Intervention

This is an essential read for anyone interested in the way language is used in the world of politics. Based on Aristotle's premise that we are all political animals, able to use language to pursue our own ends, the book uses the theoretical framework of linguistics to explore the ways in which we think and behave politically. Contemporary and high profile case studies of politicians and other speakers are used, including an examination of the dangerous influence of a politician's words on the defendants in the Stephen Lawrence murder trial. International in its perspective, *Analyzing Political Discourse* also considers the changing landscape of political language post-September 11, including the increasing use of religious imagery in the political discourse of, amongst others, George Bush. Written in a lively and engaging style, this book provides an essential introduction to political discourse analysis.

Investigative Discourse Analysis

How do understandings of the relationships between gender, violence, security and the international inform policy and practice in which these notions are central? What are the practical implications of basing policy on problematic discourses? In this highly original poststructural feminist critique, the author maps the discursive terrains of institutions, both NGOs and the UN, which formulate and implement resolutions and guides of practice that affect gender issues in the context of international policy practices. The author investigates UN Security Council Resolution 1325, passed in 2000 to address gender issues in conflict areas, in order to examine the discursive construction of security policy that takes gender seriously. In doing so, she argues that language is not merely descriptive of social/political reality but rather constitutive of it. Moving from concept to discourse, and in turn to practice, the author analyses the ways in which the resolution's discursive construction had an enormous influence over the practicalities of its implementation, and how the resulting tensions and

inconsistencies in its construction contributed to its failures. The book argues for a re-conceptualisation of gendered violence in conjunction with security, in order to avoid partial and highly problematic understandings of their practical relationship. Drawing together theoretical work on discourses of gender violence and international security, sexualised violence in war, gender and peace processes, and the domestic-international dichotomy with her own rigorous empirical investigation, the author develops a compelling discourse-theoretical analysis that promises to have far-reaching impact in both academic and policy environments.

the 21st century. Combining the latest critical theories in poststructuralist and political philosophy with discourse analysis techniques, it uses corpus tools to investigate four collections of documents harvested from national and international security organisations. This interdisciplinary approach provides insights into the ways in which discourse has been mobilised to construct a strategic response to major terrorist attacks and geo-political events. The authors identify the way in which it is used to realize tactics of governmentality and form security as a discipline. This at once constructs a state of exception while also adhering to the principles of liberalism. This insightful study will be of particular interest to students and scholars of subjects such as applied linguistics, political science, security studies and international relations, with additional relevance to other areas including law, criminology, sociology and economics.
