In this innovative work Jean Hillier develops a new theory for students and researchers of spatial planning and governance which is grounded primarily in the work of Gilles Deleuze. The theory recognizes the complex interrelation between place qualities and the multiple space-time relational dynamics of spatial governance. Using empirical examples from England and Australia, Hillier identifies the power of networks and trajectories through which various actors territorialize space and explores the social and political responsibilities of spatial managers and decision-makers. She considers what spatial planning and urban management practices could look like if they were to be developed along Deleuzean lines, and suggests alternative framings for spatial practice: broad trajectories or 'visions' of the longer-term future and shorter-term, location-specific detailed plans and projects with collaboratively determined tangible goals.

In the spring of 2003, Norman Mailer, who was then eighty years old, invited an improbable companion into his life: Dwayne Raymond, a young writer who was waiting tables at a restaurant in Provincetown, at the tip of Cape Cod, where Mailer spent most of his final years. Raymond became Mailer's aide in all matters professional and private, assisting the Pulitzer Prize-winning author on the four books he published during this time, including his last novel, *The Castle in the Forest*. As Raymond's responsibilities grew, so too did his closeness to Mailer, who in turn taught him how to navigate his own personal challenges. In this touching memoir, Dwayne Raymond presents a loving portrait of Norman Mailer in his twilight years, depicting a quirky and complex but achingly human man so unlike the Mailer of disquieting legend. Beautifully written and honestly portrayed,

Mornings with Mailer is a personal and revealing story of a great writer, his man Friday, and their unlikely but enduring friendship.

American Dan Green begins his journey on the west coast of Canada in the surf town - yes, surf town - of Tofino, home to a golf guru who holds the answers to Dan's ailing golf swing. His one month stay in Tofino renews faith in his game, and holds a cathartic quality as he sheds the darkness of a marriage gone bad that had refused to let go. With a cocky swing and a clear head Dan heads east, toward the tiny interior town of Heaven, BC, site of the inaugural Husky Open on the Canadian Tour. Without a position in the field Dan must "Monday-Qualify" in hopes of earning his way into the tournament and a shot at moving up the ranks of championship golf. Already

Behind closed doors the two develop an exciting relationship not generally known between golfer and caddy, and it appears to do no harm to Dan's golf game or spirit. At least, not at first. But there are some skeletons in Melissa's closet that come out to threaten more than Dan's chances at winning a golf tournament. A mix of humor, erotica, and drama 69 Shades of Green will take you on a thrilling ride that will change the way you look at golf pants from here on in.

They know with conviction what they believe within themselves. They understand that all actions have consequences. And they find commonsense solutions to the nation's problems. One such American, Thomas Paine, was an ordinary man who changed the course of history by penning Common Sense, the concise 1776 masterpiece in which, through extraordinarily straightforward and indisputable arguments, he encouraged his fellow citizens to take control of America's future—and, ultimately, her freedom. Nearly two and a

half centuries later, those very freedoms once again hang in the balance. And now, Glenn Beck revisits Paine's powerful treatise with one purpose: to galvanize Americans to see past government's easy solutions, two-party monopoly, and illogical methods and take back our great country.

Bradley Manning is the 24-year-old US soldier accused of the release of thousands of US embassy emails to Wikileaks. On Friday 16th December 2011, his pre-trial hearing opened in Fort Meade in Maryland. Manning faces a maximum sentence of life in custody with no chance of parole. But just a few years ago, he was a teenager in west Wales. How does his story impact on the people he left behind, and who is responsible for his 'radicalisation'? *The Radicalisation of Bradley Manning* aims to place him in the pantheon of great Welsh radicals, from the Chartists to Aneurin Beva. This young soldier, who names the president of the United States as a defence witness, knows bus timetables around Haverfordwest. This young man who played a part in the Arab spring, knows the trials of schoolboy

This anthology is in many ways a 'best of the best', containing gems from thirty-four of Britain's outstanding contemporary writers. It is a book to dip into, to read from cover to cover, to lend to friends and read again. It includes stories of love and crime, stories touched with comedy and the supernatural, stories set in London, Los Angeles, Bucharest and Tokyo. Above all, as you will discover, it satisfies Samuel Butler's anarchic pleasure principle: 'I should like to like Schumann's music better than I do; I daresay I could make myself like it better if I tried; but I do not like having to try to make myself like things; I like things that make me like them at once and no trying at all '

I know its tough when you look at super-high level athletes and think "I could never do that." That you have no way to get there. Even though you may want it badly, it seems like there is no plan nor way of training to do it. But there is a way to do this safely and reap the benefits no matter your level. And if you stick to it in a little time you'll be doing moves that'll leave others saying, "I wish I could do that!" Train Like a Gymnast Without Being a Gymnast. Here's the thing. People seem to think they can't get started without being a gymnast. I want to not only dispel that myth, but get you started right now. Let me tell you a bit about my story. The class that I wanted to attend was for former gymnasts. What this meant is that you were required to have some skill before you even began the class. The problem was I had never taken gymnastics before! If you can't attend the class unless you have some skill and you can't gain the skill without the class what do you do? The truth is you CAN gain the skill without the class by training on your own. You can train like this in the great outdoors, just like I did. A park or the beach is perfect. Martial arts studios or anywhere with a matted floor works just as good. In fact each place has its own advantages and disadvantages. This is 'Functional Training' at its best. Because nothing else will teach you how to move better. It is bodyweight training taken to the highest level. identical twins Lola and Anest remain devoted to each other. Ageing fast, and with the time they have together more fragile by the day, they arrive at a desperate decision. Word of this reaches Anest's daughter Menna, who rushes to her long abandoned childhood home where her own ideas of love and compromise are tested to the limit. In spite of the sombre themes of death and bereavement, the writing is light, textured and at times very funny: picking out moments of joy and sadness with seemingly effortless grace. Touching relationships and believable characterisation provide a poignant backdrop to Salt, Root and Roe, where pragmatism, exhausted lives and childrens' fairytales collide in this exploration of grief, loss and acceptance.

This book is a concise, readable, yet authoritative primer of basic classic thermodynamics. Many students have difficulty with thermodynamics, and find at some stage of their careers in academia or industry that they have forgotten what they learned, or never really understood these fundamental physical laws. As the title of the book suggests, the author has distilled the subject down to its essentials, using many simple and clear illustrations, instructive examples, and key equations and simple derivations to elucidate concepts. Based on many years of teaching experience at the undergraduate and graduate levels, “Essential Classical Thermodynamics” is intended to provide a positive learning experience, and to empower the reader to explore the many possibilities for applying thermodynamics in other fields of science, engineering, and even economics where energy plays a central role. Thermodynamics is fun when you understand it!

Which wars killed the most people? Was the twentieth century the most violent in history? Are religions, tyrants or ideologies responsible for the greatest bloodshed? In this remarkable and original book, 'atrocitologist' Matthew White assesses man's inhumanity to man over several thousand years. From the Punic Wars between Rome and Carthage to the cataclysmic events of World War II, Atrocitology spans centuries and civilisations as it measures the hundred most violent episodes in history. Relying on statistical analysis rather than grand theories, White offers three big lessons: chaos is more deadly than tyranny, the world is much more disorganised than we realise, and more civilians than soldiers are killed in wars—in fact, the army is usually the safest place to be during wartime. Our understanding of history's worst atrocities is patchy and skewed. This book sets the record straight, charting those events with the largest man-made death tolls without fear or favour.
