Literacy is a skill for all time, for all people. It is an integral part of our lives, whether we are students or adult professionals. Giving all educators the breadth of knowledge and practical tools that help students strengthen their literacy skills is the focus of Read, Write, Lead. Drawing on her experience as a mentor teacher, reading specialist, instructional coach, and staff developer, author Regie Routman offers time-tested advice on how to develop a schoolwide learning culture that leads to more effective reading and writing across the curriculum. She explains how every school—including yours—can: implement instructional practices that lead to better engagement and achievement in reading and writing for all students, from kindergarten through high school, including second-language and struggling learners; build Professional Literacy Communities of educators working together to create sustainable school change through professional learning based on shared beliefs; reduce the need for intervention through daily practices that ensure success, even for our most vulnerable learners; and embed the language of productive feedback in responsive instruction, conferences, and observations in order to accelerate learning for students, teachers, and leaders. In their own voices, teachers, principals, literacy specialists, and students offer real-life examples of changes that led to dramatic improvement in literacy skills and—perhaps just as important—increased joy in teaching and learning. Scattered throughout the book are “Quick Wins”—ideas and actions that can yield positive, affirming results while tackling the tough work of long-term change.

### **Improving Reading**

Offers teachers practical strategies and resources designed to help students build their phonemic awareness, phonics, fluency, vocabulary, and comprehension skills.

### **Creating Strategic Readers**

An innovator in contemporary thought on economic and political development looks here at decline rather than growth. Albert O. Hirschman makes a basic distinction between alternative ways of reacting to deterioration in business firms and, in general, to dissatisfaction with organizations: one, "exit," is for the member to quit the organization or for the customer to switch to the competing product, and the other, "voice," is for members or customers to agitate and exert influence for change "from within." The efficiency of the competitive mechanism, with its total reliance on exit, is questioned for certain important situations. As exit often undercuts voice while being unable to counteract decline, loyalty is seen in the function of retarding exit and of permitting voice to play its proper role. The interplay of the three concepts turns out to illuminate a wide range of economic, social, and political phenomena. As the author states in the preface, "having found my own unifying way of looking at issues as diverse as competition and the two-party system, divorce and the American character, black power and the failure of 'unhappy' top officials to resign over Vietnam, I decided to let myself go a little."

Inferring, questioning, determining importance. It's not easy to explain these abstract reading strategies to elementary readers, yet knowing how they work and how to use them is an important first step to connecting with texts. Fortunately Tanny McGregor has developed visual, tangible, everyday lessons that make abstract thinking concrete and that can help every child in your classroom make more effective use of reading comprehension strategies. Comprehension Connections is a guide to developing children's ability to fully understand texts by making the comprehension process achievable, accessible, and incremental. McGregor's approach sequences stages of learning for each strategy that take students from a fun object lesson to a nuanced and lasting understanding. Her lessons build bridges between the concrete and the abstract by incorporating writing, discussion, song, art, and movement into a web of creative connections that reinforce each strategy on a variety of levels. All the while Comprehension Connections offers an inside look at the dynamic of McGregor's teaching, showing you how her ideas look in action, and including the language she uses and that she encourages her students to use as they build their facility with: schema inferring questioning determining importance visualizing synthesizing. Many students struggle to understand what it is they are supposed to do as they learn to read strategically.

### **Helping Students Become Strategic Learners**

AI is radically transforming business. Are you ready? Look around you. Artificial intelligence is no longer just a futuristic notion. It's here right now--in software that senses what we need, supply chains that "think" in real time, and robots that respond to changes in their environment. Twenty-first-century pioneer companies are already using AI to innovate and grow fast. The bottom line is this: Businesses that understand how to harness AI can surge ahead. Those that neglect it will fall behind. Which side are you on? In *Human + Machine*, Accenture leaders Paul R. Daugherty and H. James (Jim) Wilson show that the essence of the AI paradigm shift is the transformation of all business processes within an organization--whether related to breakthrough innovation, everyday customer service, or personal productivity habits. As humans and smart machines collaborate ever more closely, work processes become more fluid and adaptive, enabling companies to change them on the fly--or to completely reimagine them. AI is changing all the rules of how companies operate. Based on the authors' experience and research with 1,500 organizations, the book reveals how companies are using the new rules of AI to leap ahead on innovation and profitability, as well as what you can do to achieve similar results. It describes six entirely new types of hybrid human + machine roles that every company must develop, and it includes a "leader's guide" with the five crucial principles required to become an AI-fueled business. *Human + Machine* provides the missing and much-needed management playbook for success in our new age of AI. **BOOK PROCEEDS FOR THE AI GENERATION** The authors' goal in publishing *Human + Machine* is to help executives, workers, students and others navigate the changes that AI is making to

business and the economy. They believe AI will bring innovations that truly improve the way the world works and lives. However, AI will cause disruption, and many people will need education, training and support to prepare for the newly created jobs. To support this need, the authors are donating the royalties received from the sale of this book to fund education and retraining programs focused on developing fusion skills for the age of artificial intelligence.
