Arlo Finch in the Lake of the Moon

Jo Frost, a.k.a. Supernanny, is the answer to every stressed parent's dreams. In Channel 4's prime time series Jo works miracles on problem children, by dispensing tough love, no-nonsense rules and reassuring us that parents do know best. The Supernanny method gives parents the know-how to tackle any problem area, be it mealtime, bathtime, bedtime, bedwetting, homework, sibling rivalry, aggressive behaviour or a child who just won't do what he or she is told. In an era where parents are bombarded with conflicting or guilt-laden messages at every turn, and sometimes obey their kids' commands rather than the other way around, this is an upbeat, back-to-basics approach to restoring harmony and authority in the home. Jo has a magical way with children, but her methods are simple and can and do work for anyone: regular routine, consistency, verbal warnings, time out after misbehaviour, and rewarding good behaviour with lots of attention. your ten-month-old won't sleep through the night, or your two-year-old is out of control, Jo knows what to do and can show you how to do it. For anyone who doesn't feel in charge at home, this is a godsend of a book full of brilliantly commonsense advice - the only parenting book you'll ever want.

Funny in Farsi

Maggie the Cat fights for the lives of her damaged and drinking husband Brick, herself, and their unborn children in the revised version of Williams' acclaimed dramatization of Big Daddy's birthday and deathday party and family gathering

Angela's Ashes

It's the story Hollywood has glamorized, publicized, and bombarded us with--how it all began for the two young men, now famous for the tabloid coverage of their on-

again-off-again romances, their big budget smashes and flops, and their "Project Greenlight." It started with a script for the film that became *Good Will Hunting*, slaved over by the bright young dreamers (portrayed in this play's premier by the female playwrights) in their run-down apartment in Somerville, Massachusetts, in 1996. Or was it This hilarious, scathing play takes us back to the pivotal moment when the finished script that would change their lives fell from the ceiling while they were working on something else. The laughs come at a manic pace, in this delightfully venomous play that has taken off-Broadway by storm.

Cold Storage

Death of a Salesman

This collection of 23 new essays focuses on the lives of female screenwriters of Golden Age Hollywood, whose work helped create those unforgettable stories and characters beloved by audiences--but whose names have been left out of most film histories. The contributors trace the careers of such writers as Anita Loos, Adela Rogers St. Johns, Lillian Hellman, Gene Gauntier, Eve Unsell and Ida May Park, and explore themes of their writing in classics like *Gentlemen Prefer Blondes*, *Ben Hur*, and *It's a Wonderful Life*.

The Sporting News

Voted America's Best-Loved Novel in PBS's *The Great American Read* Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Board of Contract Appeals Decisions

John Ford (1894-1973) is universally acknowledged as one of the greatest directors in the history of cinema. He is the only person to win four Academy Awards for Direction, and he was also honored by receiving virtually every other cinematic award for his work as a director. This reference book provides researchers an opportunity to locate quickly and conveniently a vast body of information about John Ford. The heart of the volume is a detailed filmography, which includes individual entries for 184 motion pictures with which Ford was involved. The entries provide plot summaries, critical commentaries, cast and credit information, and excerpts from reviews. Also of importance is the book's enormous annotated bibliography, which cites more than 1000 works. The opening biography examines Ford as a person, as a director, and as a cinematic influence and provides a

background for the entries that comprise the bulk of the volume. Additional sections include a chronology; a list of Ford's unrealized projects; his radio, television, and theater credits; his awards and honors; and special collections and archives.

A Raisin in the Sun

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

Loonshots

Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe.

To Kill a Mockingbird

Life of Pi

A comprehensive guide to more than 20,000 films, including such information as cast members, writers, directors and producers, and reviews.

The Neverending Story

NEW YORK TIMES BESTSELLER • Finalist for the PEN/USA Award in Creative Nonfiction, the Thurber Prize for American Humor, and the Audie Award in Biography/Memoir This Random House Reader's Circle edition includes a reading group guide and a conversation between Firoozeh Dumas and Khaled Hosseini, author of *The Kite Runner*! "Remarkable . . . told with wry humor shorn of sentimentality . . . In the end, what sticks with the reader is an exuberant immigrant embrace of America."—San Francisco Chronicle In 1972, when she was seven, Firoozeh Dumas and her family moved from Iran to Southern California, arriving with no firsthand knowledge of this country beyond her father's glowing memories of his graduate school years here. More family soon followed, and the clan has been here ever since. *Funny in Farsi* chronicles the American journey of Dumas's wonderfully engaging family: her engineer father, a sweetly quixotic dreamer who first sought riches on Bowling for Dollars and in Las Vegas, and later lost his job during the Iranian revolution; her elegant mother, who never fully mastered English (nor cared to); her uncle, who combated the effects of American fast food with an army of miraculous American weight-loss gadgets; and Firoozeh herself, who as a girl changed her name to Julie, and who encountered a second wave of culture shock when she met and married a Frenchman, becoming part of a one-couple melting pot. In a series of deftly drawn scenes, we watch the family grapple with American English (hot dogs and hush puppies?—a complete mystery),

American traditions (Thanksgiving turkey?—an even greater mystery, since it tastes like nothing), and American culture (Firoozeh’s parents laugh uproariously at Bob Hope on television, although they don’t get the jokes even when she translates them into Farsi). Above all, this is an unforgettable story of identity, discovery, and the power of family love. It is a book that will leave us all laughing—without an accent. Praise for *Funny in Farsi* “Heartfelt and hilarious—in any language.”—*Glamour* “A joyful success.”—*Newsday* “What’s charming beyond the humor of this memoir is that it remains affectionate even in the weakest, most tenuous moments for the culture. It’s the brilliance of true sophistication at work.”—*Los Angeles Times Book Review* “Often hilarious, always interesting . . . Like the movie *My Big Fat Greek Wedding*, this book describes with humor the intersection and overlapping of two cultures.”—*The Providence Journal* “A humorous and introspective chronicle of a life filled with love—of family, country, and heritage.”—*Jimmy Carter* “Delightfully refreshing.”—*Milwaukee Journal Sentinel* “[*Funny in Farsi*] brings us closer to discovering what it means to be an American.”—*San Jose Mercury News*

A Resource Guide to the Golden Age of Radio

When an acorn hits him on the head, Chicken Little is joined by several other silly birds as he sets off to warn the king that the sky is falling.

Editor & Publisher

Korean edition of a New York Times bestseller and the Pulitzer Prize-winning book *ANGELA'S ASHES: A Memoir* by Frank McCourt. Despite extreme poverty and desperation of his childhood McCourt recounts his early age in an affecting and uplifting voice in this luminous memoir. Translated by Kim Lucia. In Korean. Distributed by Tsai Fong Books, Inc.

Films in Review

"I am doomed to remember a boy with a wrecked voice—not because of his voice, or because he was the smallest person I ever knew, or even because he was the instrument of my mother's death, but because he was the reason I believe in God; I am a Christian because of Owen Meany." In the summer of 1953, two eleven-year-old boys—best friends—are playing in a Little League baseball game in Gravesend, New Hampshire. One of the boys hits a foul ball that kills the other boy's mother. The boy who hits the ball doesn't believe in accidents; Owen Meany believes he is God's instrument. What happens to Owen, after that 1953 foul ball, is extraordinary and terrifying.

Library Journal

From world-renowned scientist Jane Goodall, as seen in the new National Geographic documentary *Jane*, comes an inspiring message about the future of the animal kingdom. With the insatiable curiosity and conversational prose that have made her a bestselling author, Goodall - along with Cincinnati Zoo Director Thane Maynard - shares fascinating survival stories about the American Crocodile, the California Condor, the Black-Footed Ferret, and more; all formerly endangered species and species once on the verge of extinction whose populations are now being regenerated. Interweaving her own first-hand experiences in the field with the compelling research of premier scientists, Goodall illuminates the heroic efforts of dedicated environmentalists and the truly critical need to protect the habitats of these beloved species. At once a celebration of the animal kingdom and a passionate call to arms, *HOPE FOR ANIMALS THEIR WORLD* presents an uplifting, hopeful message for the future of animal-human coexistence. *PRAISE FOR HOPE FOR ANIMALS AND THEIR WORLD* "Goodall's intimate writing style and sense of wonder pull the reader into each account. The mix of personal and scientific makes for a compelling read." -Booklist "These accounts of conservation success are inspirational." - Publishers Weekly

Book Review Digest

Classic adventure novel recounts the adventures of an aristocratic English child reared by African apes after the death of his parents. Original, exotic, highly readable.

The War of the Worlds

Here's Johnny is like sitting with Ed and Johnny over lunch: The last time I saw Johnny, about a year before he died, we had chicken, a couple of glasses of red wine, and then we just sat there and reminisced, going back and forth the way we did on the show. We talked about our kids, and our careers and the state of America, just two lucky guys who loved each other and the good luck of our careers. Ed McMahon is the only person who was with Johnny Carson, even before *The Tonight Show*, when they both first appeared on *Who Do You Trust*. Now, with Johnny's blessing before he died, McMahon can finally share all the stories that only he knows. From the sofa at Johnny's right, to backstage, to their personal relationship - McMahon will provide a real view of the man who was so careful to only show one side of himself to the public. Brilliant in front of the camera, but shy

in person, Carson seldom gave interviews. Only McMahon can tell the stories and provide the insights into the personality that made Johnny Carson more of a friend we invited into our home than a television star. This entertaining tribute will feature over 200 pictures, many never before published, from both McMahon's and Carson's private archives.

A Tree Grows in Brooklyn

Funnybooks

My Beloved World

"On every level, Cold Storage is pure, unadulterated entertainment." —Douglas Preston, The New York Times Book Review For fans of *The Martian*, *Dark Matter*, and *Before the Fall* comes an astonishing debut thriller by the screenwriter of *Jurassic Park*: a wild and terrifying bioterrorism adventure about three strangers who must work together to contain a highly contagious, deadly organism that could destroy all of humanity. They thought it was contained. They were wrong. When Pentagon bioterror operative Roberto Diaz was sent to investigate a suspected biochemical attack, he found something far worse: a highly mutative organism capable of extinction-level destruction. He contained it and buried it in cold storage deep beneath a little-used military repository. Now, after decades of festering in a forgotten sub-basement, the specimen has found its way out and is on a lethal feeding frenzy. Only Diaz knows how to stop it. He races across the country to help two unwitting security guards—one an ex-con, the other a single mother. Over one harrowing night, the unlikely trio must figure out how to quarantine this horror again. All they have is luck, fearlessness, and a mordant sense of humor. Will that be enough to save all of humanity?

Modern Trials

The first Hispanic and third woman appointed to the United States Supreme Court, Sonia Sotomayor has become an instant American icon. Now, with a candor and intimacy never undertaken by a sitting Justice, she recounts her life from a Bronx housing project to the federal bench, a journey that offers an inspiring testament to her own extraordinary determination and the power of believing in oneself. Here is the story of a precarious childhood, with an alcoholic father (who would die when she was nine) and a devoted but overburdened mother, and of the refuge a little girl took from the turmoil at home with her passionately spirited paternal grandmother. But it was when she was diagnosed with juvenile diabetes that the precocious Sonia recognized she must ultimately depend on herself. She would learn to give herself the insulin shots she needed to survive and soon imagined a path to a different life. With only television characters for her professional role models, and little understanding of what was involved, she determined to become a lawyer, a dream that would sustain her on an unlikely course, from valedictorian of her high school class to the highest honors at Princeton, Yale Law School, the New York County District Attorney's office, private practice, and appointment to

the Federal District Court before the age of forty. Along the way we see how she was shaped by her invaluable mentors, a failed marriage, and the modern version of extended family she has created from cherished friends and their children. Through her still-astonished eyes, America's infinite possibilities are envisioned anew in this warm and honest book, destined to become a classic of self-invention and self-discovery.

Screen Couple Chemistry

Tarzan of the Apes

Follows one young man from his impoverished childhood with a crack-addicted mother, through his discovery of the sport of football, to his rise to become one of the most successful, highly-paid players in the NFL.

When Women Wrote Hollywood

Here's Johnny!

Astaire and Rogers, Tracy and Hepburn. Just the mention of their names evokes the powerful chemistry between these screen couples, which utterly transcended the often formulaic films in which they appeared together. Indeed, watching the synergistic flow of energy between charismatic screen partners is one of the great pleasures of cinema and television, as well as an important vehicle for thinking through issues of intimacy and gender relations. In this book, Martha P. Nochimson engages in a groundbreaking study of screen couple chemistry. She begins by classifying various types of couples to define what sets the synergistic couple apart from other onscreen pairings. Then she moves into extended discussions of four enduring screen couples—Maureen O'Sullivan/Johnny Weissmuller, Myrna Loy/William Powell, Fred Astaire/Ginger Rogers, and Katharine Hepburn/Spencer Tracy. Using theories of neuroscience, she demonstrates that their onscreen chemistry is a very real phenomenon, powerful enough to subvert conventional formulations of male/female relations. Material she has uncovered in the infamous Production Code Administration files illuminates the historical context of her contentions. Finally, Nochimson traces the screen couple to its present-day incarnation in such pairs as Woody Allen/Diane Keaton, Scully/Mulder of *The X-Files*, and Cliff/Claire Huxtable of *The Cosby Show*.

Cat on a Hot Tin Roof

“A thrilling adventure full of magic and wonder. John August is a master storyteller.” —Ransom Riggs, #1 New York Times–bestselling author of *Miss Peregrine's Home for Peculiar Children* From acclaimed screenwriter John August, Arlo Finch in the Lake of the Moon continues the spellbinding fantasy adventure series about the magic that lies just beyond our world. Some legends are real. For Arlo Finch and the Rangers of Pine Mountain Company, summer camp is more than canoeing and hiking. It's also a chance to search for ancient forest spirits and

discover mysterious messages encoded in tree bark. But when Arlo and his best friends Indra and Wu stumble upon clues about the long-lost Yellow Patrol, Arlo uncovers a stunning history that leads right back to his very own family.

Halliwell's Film Guide

Dramas and Works Prepared for Oral Delivery

For thousands of years, healers have used plants to cure illness. Aspirin, the world's most widely used drug, is based on compounds originally extracted from the bark of a willow tree, and more than a quarter of medicines found on pharmacy shelves contain plant compounds. Now Western medicine, faced with health crises such as AIDS, Alzheimer's disease, and cancer, has begun to look to the healing plants used by indigenous peoples to develop powerful new medicines. Nowhere is the search more promising than in the Amazon, the world's largest tropical forest, home to a quarter of all botanical species on this planet—as well as hundreds of Indian tribes whose medicinal plants have never been studied by Western scientists. In *Tales of a Shaman's Apprentice*, ethnobotanist Mark J. Plotkin recounts his travels and studies with some of the most powerful Amazonian shamans, who taught him the plant lore their tribes have spent thousands of years gleaned from the rain forest. For more than a decade, Dr. Plotkin has raced against time to harvest and record new plants before the rain forests' fragile ecosystems succumb to overdevelopment—and before the Indians abandon their own culture and learning for the seductive appeal of Western material culture. *Tales of a Shaman's Apprentice* relates nine of the author's quests, taking the reader along on a wild odyssey as he participates in healing rituals; discovers the secret of curare, the lethal arrow poison that kills in minutes; tries the hallucinogenic snuff *epena* that enables the Indians to speak with their spirit world; and earns the respect and fellowship of the mysterious shamans as he proves that he shares both their endurance and their reverence for the rain forest. Mark Plotkin combines the Darwinian spirit of the great writer-explorers of the nineteenth century—curious, discursive, and rigorously scientific—with a very modern concern for the erosion of our environment and the vanishing culture of native peoples.

Hope for Animals and Their World

* Instant WSJ bestseller * Translated into 18 languages * #1 Most Recommended Book of the year (Bloomberg annual survey of CEOs and entrepreneurs) * An Amazon, Bloomberg, Financial Times, Forbes, Inc., Newsweek, Strategy + Business, Tech Crunch, Washington Post Best Business Book of the year * Recommended by Bill Gates, Daniel Kahneman, Malcolm Gladwell, Dan Pink, Adam Grant, Susan Cain, Sid Mukherjee, Tim Ferriss *Why do good teams kill great ideas?* *Loonshots* reveals a surprising new way of thinking about the mysteries of group behavior that challenges everything we thought we knew about nurturing radical breakthroughs. Bahcall, a physicist and entrepreneur, shows why teams, companies, or any group with a mission will suddenly change from embracing new ideas to rejecting them, just as flowing water will suddenly change into brittle ice. Mountains of print have been written about culture. *Loonshots* identifies the small

shifts in structure that control this transition, the same way that temperature controls the change from water to ice. Using examples that range from the spread of fires in forests to the hunt for terrorists online, and stories of thieves and geniuses and kings, Bahcall shows how a new kind of science can help us become the initiators, rather than the victims, of innovative surprise. Over the past decade, researchers have been applying the tools and techniques of this new science—the science of phase transitions—to understand how birds flock, fish swim, brains work, people vote, diseases erupt, and ecosystems collapse. Loonshots is the first to apply this science to the spread of breakthrough ideas. Bahcall distills these insights into practical lessons creatives, entrepreneurs, and visionaries can use to change our world. Along the way, readers will learn how chickens saved millions of lives, what James Bond and Lipitor have in common, what the movie Imitation Game got wrong about WWII, and what really killed Pan Am, Polaroid, and the Qing Dynasty. “If The Da Vinci Code and Freakonomics had a child together, it would be called Loonshots.” —Senator Bob Kerrey

Supernanny

The Caine mutiny

Funnybooks is the story of the most popular American comic books of the 1940s and 1950s, those published under the Dell label. For a time, "Dell Comics Are Good Comics" was more than a slogan—it was a simple statement of fact. Many of the stories written and drawn by people like Carl Barks (Donald Duck, Uncle Scrooge), John Stanley (Little Lulu), and Walt Kelly (Pogo) repay reading and rereading by educated adults even today, decades after they were published as disposable entertainment for children. Such triumphs were improbable, to say the least, because midcentury comics were so widely dismissed as trash by angry parents, indignant librarians, and even many of the people who published them. It was all but miraculous that a few great cartoonists were able to look past that nearly universal scorn and grasp the artistic potential of their medium. With clarity and enthusiasm, Barrier explains what made the best stories in the Dell comic books so special. He deftly turns a complex and detailed history into an expressive narrative sure to appeal to an audience beyond scholars and historians.

John Ford

"A Raisin in the Sun" reflects Lorraine Hansberry's childhood experiences in segregated Chicago. This electrifying masterpiece has enthralled audiences and has been heaped with critical accolades. "The play that changed American theatre forever" - The New York Times.

Matt & Ben

The chilling novel account of a Martian invasion of London in the nineteenth century -- a science fiction classic for all time.
