When The Sound of One Hand Clapping came out in Japan in 1916 it caused a scandal. Zen was a secretive practice, its wisdom relayed from master to novice in strictest privacy. That a handbook existed recording not only the riddling koans that are central to Zen teaching but also detailing the answers to them seemed to mark Zen as rote, not revelatory. For all that, The Sound of One Hand Clapping opens the door to Zen like no other book. Including koans that go back to the master who first brought the koanteaching method from Japan to China in the eighteenth century, this book offers, in the words of the translator, editor, and Zen initiate Yoel Hoffmann, "the clearest, most detailed, and most correct picture of Zen" that can be found. What we have here is an extraordinary introduction to Zen thought as lived thought, a treasury of problems, paradoxes, and performance that will appeal to artists, writers, and philosophers as well as Buddhists and students of religion.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. This collection reveals the history of English common law and Empire law in a vastly changing world of British expansion. Dominating the legal field is the Commentaries of the Law of England by Sir William Blackstone, which first appeared in 1765. ‘So many of our negative emotions are ultimately driven by fear. In this incredibly personal, powerful book, Pippa Grange shows us how to face our fears and live free, fulfilled lives. A revelation.’ Fearne Cotton If we were truly free from fear, what could we achieve? We strive for success, but we are rarely happy. The more we try to win – putting on a brave face for work or family – the more we risk losing ourselves. And even reaching our goals can feel strangely hollow. The culprit? Fear. It makes us anxious, or shameful, or turns us into perfectionists. We pretend to be someone else while aiming for a status that’s never truly satisfying. There is another way. A way to find our true voice, to win on our own terms. Building that open mindset is at the heart of this mould-breaking book by Dr Pippa Grange, the psychologist who helped transform the England team, taking them all the way to the World Cup semi-finals in 2018. In Fear Less, Pippa Grange shows all of us how, by starting to live with less fear, we can find our real passions and deeper fulfilment. Her simple manifesto enables us to replace stress with courage, and connect with the people around us on a far deeper level. This type of success isn’t about trophies or beating others, it’s about winning at the very deepest level: winning from within. It’s time to fear less.

The worldwide consumption of surfactants now exceeds several million tonnes per annum. Six of the major types represent approximately 80% of the volume consumed, whereas the remaining 20% is made up of approximately 40 different chemical types. Commercially produced surface active agents are not pure chemicals, and within each chemical type there can be tremendous variation. Technical staff who are not familiar with surfactants are frequently bewildered by the enormous variety of different products on the market and the vast body of literature which exists on the composition and properties of surfactants. The

selection of the best surfactant for any given use therefore becomes a major problem. This volume arose from the clear need to have available a simple reference book summarising the different types of surfactants on the market and their properties. The concept and structure of the book evolved from early attempts to define chemical structure/property relationships of all the different types of surfactants commercially available, into a simple handbook providing essential background information for the surfactant user. It is realised that most users will be developing their own data bank of structure/end use property relationships and they will therefore be the experts on end use.

International Bestseller: A novel of youthful love and loss and “a powerful evocation of the war years” in England (The Guardian). On a hot August evening in 1939, cousins Oliver, Calypso, Polly, Walter, and Sophy spent one last night together, celebrating the end of summer, at the home of their aunt and uncle. Now, forty years later, as the motley cast of characters drive to the funeral of one of their own, they recall how important that night truly was—and all that came after. From Oliver, whose desperation to prove himself in war ended up as his downfall, to Calypso, whose flirtations landed her in an unlikely marriage with even less likely results, to Sophy, whose secrets from that night haunted her for the rest of her life, each of them recalls the twisted paths of love and betrayal they walked as the country came apart around them under the coming shadow of World War II. Mary Wesley masterfully interweaves tragedy and humor in this “extraordinarily accomplished and fast-moving” novel, presenting a tale of both the world at large and the dalliances, allegiances, and losses of her expertly crafted characters (Financial Times).
