The Sourcebook on Lesbian/gay Health Care

With all the enormous resources that are invested in medicine, it is sometimes a mystery why there is so much sickness still in evidence. Our life span, though higher than at any time in history, has now leveled off and has not significantly increased in the last two generations. There is a one-third increase in long-term illness in the last 20 years and a 44% increase in

cancer incidence, which are not related to demographic issues. In some modern countries, the level of morbidity (defined as days off work because of sickness) has increased by two thirds in this time. Despite \$1 trillion spent on cancer research in 20 years, the "War On Cancer" has recently been pronounced a complete failure by the u. s. President's Cancer Panel. Evidently we still have a long way to go. The goal of "Health for All by the Year 2000" as the World Health Organization has put it, is another forgotten dream. As ever, the answer will be found in breaking out of the old philosophical patterns and discovering the new, as yet unacceptable concepts. The problems of medicine today require a Kuhnian breakthrough into new paradigms, and new ways of thinking. And these new ways will not be mere variations of the old, but radical departures. This book, and the conference upon which it was based, is part of a search for these new pathways.

All natural health treatments, whether they involve dietary changes, vitamin or herbal supplementation, detoxification therapies, or bodywork, focus on removing the disease causing agents using the body's own power of healing. This process often brings on an unpleasant reaction known as the 'healing crisis'. Unlike a disease crisis (illness) the healing crisis is a sign of improving health. In this book you will learn how to distinguish between a healing crisis and a disease crisis. You will learn how healing works, what to do, and what not to do to facilitate healing, and how to cope with unpleasant symptoms until the crisis is over. If you undergo any type of natural healing program, you must be well informed about the symptoms and processes of the healing crisis. The book will guide you through the natural healing process.

Taking Your Back to the Future

Light Emerging

Barbara Ann Brennan continues her ground-breaking exploration of the human energy field, or aura—the source of our experience of health or illness. Drawing on many new developments in her teaching and practice, she shows how we can be empowered as both patients and healers to understand and work with our most fundamental healing power: the light that emerges from the very center of our humanity. In a unique approach that encourages a cooperative effort among healer, patient, and other health-care providers, Light Emerging explains what the healer perceives visually, audibly, and kinesthetically and how each of us can participate in every stage of the healing process. Presenting a fascinating range of research, from a paradigm of healing based on the science of holography to insights into the "hara level" and the "core star," Light Emerging is at the leading edge of healing practice in our time.

The Health Robbers

To me Steven J. Pollack, D.C. represents the vision and integrity, which form the foundation of Chiropractic health care. Over the past 20 years I've enjoyed the opportunity to be Steve's colleague and more importantly, his friend. Together we have endured and adapted to the dramatic changes to the "business" of health care. Despite these erratic changes "Dr. Steve" has never once lost his focus on the science, art, and philosophy of Chiropractic. One minute around him and you will know he has never been "in" Chiropractic. Chiropractic lives in him! --Paul Basile, D.C.

Golden Rules for Vibrant Health in Body, Mind, and Spirit

Public health is of concern to practicing chiropractors, as well as chiropractic students. The vast majority of chiropractors utilize public health concepts every day as an integral part of patient care. For instance, they give advice on risk factors that should be avoided and protective factors to be added by their patients to enhance healing and prevent illness. Public health is also part of the curriculum at all chiropractic colleges and is tested by the National Board. No public health textbooks are available that are specifically designed for the chiropractor. Consequently, college instructors are forced to make-do with class notes and generic texts that do not address the specific issues relevant to chiropractic. This book will not only be of interest to chiropractic students, but also practicing chiropractors because it will provide information they can utilize to provide better care by positively intervening with their patients and their communities regarding public health matters.
