Although the spirit of the sport remains, the technology and competitive formats have advanced tremendously through the years. The number of events has increased to the point where the sport produces a true reflection of the world's best swimmers when competing in various distances and performing different strokes. Historical Dictionary of Competitive Swimming examines the sport since its inception as an athletic event through a chronology, an introductory essay, a bibliography, and appendixes that detail Olympic and World Championships medal winners. The dictionary section contains more than 500 cross-referenced entries on individuals, major competitions, competitive strokes, and countries that have enjoyed significant success in the sport.

friends (old and new); families (immediate and extended); lovers (ephemeral and eternal); and movie-houses (neighborhoods and forgotten whereabouts) — and even favorite concession-stand munchies! Great films etch themselves on our brains. But it's not the whole film we remember — it is a selective scene here and there that has the power to stay with us for a lifetime. Beginning and established filmmakers would do well to remember this important and powerful influence of film and to study great moments that we will always remember — so that they too can pause, reflect, and remember to create "moments of illumination" in their own works.? Illuminations: Memorable Movie Moments incorporates contemporaneous reviews and archival appraisals of more than 50 films over nine decades. The book investigates the clashing judgments, the irresistible attractions, and the lifelong impact of movies, their exacting moments, and individual and collective cinematic remembrances. Humorous, nostalgic, melancholy, and historic reminiscences echo the creativeness of movie-making upon the imagination, and the accumulated storehouse of memory.

beautiful woman who loved Roark passionately, but married his worst enemy and of the fanatic denunciation unleashed by an enraged society against a great creator. As fresh today as it was then, Rand's provocative novel presents one of the most challenging ideas in all of fiction—that man's ego is the fountainhead of human progress "A writer of great power. She has a subtle and ingenious mind and the capacity of writing brilliantly, beautifully, bitterly This is the only novel of ideas written by an American woman that I can recall."—The New York Times

The Most Memorable Moments in Olympic Swimming

The New York Times bestselling authors of *Switch* and *Made to Stick* explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter

for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world’s youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? *The Power of Moments* shows us how to be the author of richer experiences.

Memorable Moments with the Mother

Replays, Rivalries, and Rumbles

Doctors hold a pretty special place in our lives. They're often there when we're born, and they're usually there when we die. They're there for a lot of the scary or weird stuff that happens in between, too. In *That's Why I'm a Doctor*, award-winning journalist Mark Bulgutch brings together forty-six stories from a diverse group of physicians, including pediatricians, interventional radiologists, general surgeons, psychiatrists, family doctors, gastroenterologists, ophthalmologists, gynecologists, neurologists and more. Each doctor's story describes the moment that left them thinking, "That's why I became a doctor." This volume includes stories of innovation (developing a treatment for cholera); rare and fascinating medical cases (the separation of conjoined twins); the less dramatic but still quietly satisfying times when the doctor was able to have a lasting positive impact on the life of a patient or their family; and, of course, those unexpected moments when the patient taught the doctor an important life lesson that would inform their

practice for years to come. These stories, big and small, are tied together by a sense of caring. It's impossible to read what these doctors have to say and not come away with a new understanding of what goes through the mind of the person on the other end of the stethoscope and how dedicated doctors must be to do what they do.

The Young and the Restless
