Instant National Bestseller! Wall Street Journal and USA Today Bestseller! Three-time New York Times bestseller Adam Carolla is back to take on social media, social justice warriors, and a society gone to s\*\*t. As seen on Fox News's Fox & Friends! "As the revolution reaches its final, most humorless stage, there's no better, braver, or more insightful observer than Adam Carolla. You may feel despondent about what's happening right now. This book will remind you that you should also be amused."—Tucker Carlson In I'm Your Emotional Support Animal, Adam Carolla examines how our culture went careening off a cliff. We used to have one that created real warriors who fought world wars. Now it spawns social justice warriors who fight Twitter wars. He takes on those who are traumatized by Trump and "emotional support animal" owners who proclaim their victimhood at every airport. He stands up for the collateral damage of the #MeToo movement and for freedom of speech on "safe space" filled college campuses. Examining the calculated commercials churned out by Madison Avenue, like the ones about cars "made with love," Carolla rants on ads designed to either bum us out or make us think the corporation is run by Mr. Rogers. Turning to social media, Adam takes down the "hashtag heroes" who signal their virtue daily from atop Twitter mountain. And in the era of the Roomba, performances by dead celebrity holograms, and meals-on-demand delivery services, he looks down the road at our not-so-bright future as a species. "Adam and I agree on absolutely nothing but he's a sharp, smart, funny guy to disagree with. And there's a human heart under all the gruffness, snark, and melted cheese."—Patton Oswalt Frank, funny, and utterly unapologetic, this is not a book for those who need a trigger warning, but is THE book for everyone who wants to hit the snooze bar on the "woke" culture.

### **The Binding**

In *We Are the Weather*, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for

## **The Home Edit**

"Families are riddled with untold secrets. But Stephen Hinshaw would have never thought that in his family a profound secret had been kept under lock and key for 18 years. From the moment his father revealed his long history with mental illness and involuntary hospitalizations, Hinshaw knew his life would be changed forever. Hinshaw calls his father's reveal "psychological birth"--after years of experiencing the ups and downs of his father's illness without knowing it existed, watching him disappear for weeks at a time only to return as the loving father he had always known, everything he experienced as a child began to make sense. He learned as much as possible about his father's illness, and what began as an exploration into his father's past and mental health turned into a full-fledged career as a clinical psychologist. In *Another Kind of Madness*, Hinshaw explores the burden of living in a family "loaded" with mental illness and debunks the "stigma" behind it, explaining that in today's society, mental health problems can result in a loss of a driver's license, inability to vote or run for office, ineligibility for jury service, or automatic relinquishment of child custody. With a moving personal narrative and shocking facts about how America views mental health conditions in the 21st century, *Another Kind of Madness* is a passionate call to arms regarding the importance of destigmatizing mental illness"--

### **ADHD**

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

## **Immunobiology**

The Tibetan Book of the Dead is one of the texts that, according to legend, Padma-Sambhava was compelled to hide during his visit to Tibet in the late 8th century. The guru hid his books in stones, lakes, and pillars because the Tibetans of that day and age were somehow unprepared for their teachings. Now, in the form of the ever-popular Tibetan Book of the Dead, these teachings are constantly being discovered and rediscovered by Western readers of many different backgrounds--a phenomenon which began in 1927 with Oxford's first edition of Dr. Evans-Wentz's landmark volume. While it is traditionally used as a mortuary text, to be read or recited in the presence of a dead or dying person, this book--which relates the whole experience of death and rebirth in three intermediate states of being--was originally understood as a guide not only for the dead but also for the living. As a contribution to the science of death and dying--not to mention the belief in life after death, or the belief in rebirth--The Tibetan Book of the Dead is unique among the sacred texts of the world, for its socio-cultural influence in this regard is without comparison. This fourth edition features a new foreword, afterword, and suggested further reading list by Donald S. Lopez, author of Prisoners of Shangri-La: Tibetan Buddhism and the West. Lopez traces the whole history of the late Evans-Wentz's three earlier editions of this book, fully considering the work of contributors to previous editions (C. G. Jung among them), the sections that were added by Evans-Wentz along the way, the questions surrounding the book's translation, and finally the volume's profound importance in engendering both popular and academic interest in the religion and culture of Tibet. Another key theme that Lopez addresses is the changing nature of this book's audience--from the prewar theosophists to the beat poets to the hippies to contemporary exponents of the hospice movement--and what these audiences have found (or sought) in its very old pages.

## Shipwreck

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

### **Sapiens**

Rates of diagnosis of attention-deficit/hyperactivity disorder (ADHD) are skyrocketing, throughout America and the rest of the world. U.S. rates of youth diagnosis have increased 40% from just a decade ago. Adults with ADHD are now the fastest-growing segment of the population receiving diagnosis and medication. The disorder is painful and sometimes disabling for individuals and tremendously costly for society; yet, widespread misinformation, skepticism, and unanswered questions have jeopardized effective diagnosis and treatment. Researched and written by Stephen Hinshaw, an international expert on ADHD, and Katherine Ellison, a Pulitzer-Prize winning journalist and author, ADHD: What Everyone Needs to Know® is the go-to book for authoritative, current, accurate, and compelling information about the global ADHD epidemic. This book addresses questions such as: · Is ADHD a genuine medical condition or a means of pathologizing active and exploratory behavior? · Do medications for ADHD serve as needed treatments, or are they attempts at social control, designed to bolster profits of pharmaceutical firms? · Has the ADHD label become a ruse by which parents can game the educational system for accommodations? · How do symptoms and impairments related to ADHD differ between girls and women and

boys and men? · Why are ADHD medications often used as performance enhancers by college and high-school students? ADHD: What Everyone Needs to Know® clears the air of the most polarizing and misleading information that abounds, providing straight talk and sound guidelines for educators, policymakers, health professionals, parents, and the general public. It shows the reality of ADHD but does not ignore the forces that have pushed up rates of diagnosis to alarmingly high levels.
