Traditional thinking habits of businesses need to be greatly improved. Analysis and judgement are no longer enough to make important corporate decisions; you can analyse the past but you have to design the future. Corporate decisions depend on values. Disputes and conflicts often arise because of a clash of those values; each party in the dispute wants to pursue its own values, often at the expense of the other party. It is therefore essential that companies, managers and employees have a full understanding of the values of everyone involved to design a way forward that benefits all parties. From the bestselling author of *How to Have a Beautiful Mind* and *Six Thinking Hats*, this groundbreaking business book

provides a basis for value assessment, an essential tool in decision-making for 21st century corporations. De Bono demonstrates that values come into all areas of thinking, behaviour and decision-making and outlines a framework to focus employees' attention on a variety of values including human values, organisational values, cultural values and perceptual values. By introducing a scoring system to rate different values as strong, sound, weak or remote de Bono helps readers to prioritise and make executive decisions that count.

### **Wake Up America Before It's Too Late!**

#1 New York Times Bestseller Best Books of 2018  
--The Economist A personal and urgent examination of Fascism in the twentieth century and how its legacy shapes today's world, written by one of America's most admired public servants, the first woman to serve as U.S. secretary of state A Fascist, observes Madeleine Albright, "is someone who claims to speak for a whole nation or group, is utterly unconcerned with the rights of others, and is willing to use violence and whatever other means are necessary to achieve the goals he or she might have." The twentieth century was defined by the clash between democracy and Fascism, a struggle that created uncertainty about the survival of human freedom and left millions dead. Given the horrors of that experience, one might expect the world to reject the spiritual successors to Hitler and Mussolini should they arise in our era. In *Fascism: A Warning*, Madeleine Albright draws on her experiences as a child in war-torn Europe and her distinguished career as a diplomat to question that assumption. Fascism, as she shows, not only endured through the twentieth century but now presents a more virulent threat to peace and justice than at any time since the end of World War II. The momentum toward democracy that swept the world when the Berlin Wall fell has gone

into reverse. The United States, which historically championed the free world, is led by a president who exacerbates division and heaps scorn on democratic institutions. In many countries, economic, technological, and cultural factors are weakening the political center and empowering the extremes of right and left. Contemporary leaders such as Vladimir Putin and Kim Jong-un are employing many of the tactics used by Fascists in the 1920s and 30s. *Fascism: A Warning* is a book for our times that is relevant to all times. Written by someone who has not only studied history but helped to shape it, this call to arms teaches us the lessons we must understand and the questions we must answer if we are to save ourselves from repeating the tragic errors of the past.

First published in 1955, *They Thought They Were Free* is an eloquent and provocative examination of the development of fascism in Germany. Mayer's book is a study of ten Germans and their lives from 1933-45, based on interviews he conducted after the war when he lived in Germany. Mayer had a position as a research professor at the University of Frankfurt and lived in a nearby small Hessian town which he disguised with the name "Kronenberg." "These ten men were not men of distinction," Mayer noted, but they had been members of the Nazi Party; Mayer wanted to discover what had made them Nazis. "What happened here was the gradual habituation of the people, little by little, to being governed by surprise; to receiving decisions deliberated in secret;

### **It's Never Too Late**

After service in Vietnam, as a surgeon for the 11th Armored Cavalry Regiment in 1968-69, at the height of the war, Dr. Gordon Livingston returned to the U.S. and began work as a psychiatrist. In that capacity, he has listened to people talk about their lives-what works, what doesn't, and the limitless ways (many of them self-inflicted) that people find to be unhappy. He is also a parent twice bereaved; in one thirteen-month period, he lost his eldest son to suicide, his youngest

to leukemia. Out of a lifetime of experience, Gordon Livingston has extracted thirty bedrock truths: We are what we do. Any relationship is under the control of the person who cares the least. The perfect is the enemy of the good. Only bad things happen quickly. Forgiveness is a form of letting go, but they are not the same thing. The statute of limitations has expired on most of our childhood traumas. Livingston illuminates these and twenty-four others in a series of carefully hewn, perfectly calibrated essays, many of which focus on our closest relationships and the things that we do to impede or, less frequently, enhance them. Again and again, these essays underscore that “we are what we do,” and that while there may be no escaping who we are, we have the capacity to face loss, misfortune, and regret and to move beyond them—that it is not too late. Full of things we may know but have not articulated to ourselves, *Too Soon Old, Too Late Smart* offers solace, guidance, and hope to everyone ready to become the person they'd most like to be.

And they are especially poisonous for the hearts and minds of children from religious families of every faith—ordinary families who value traditional morality and plain old common sense. Parents' first duty is to their children—to their intellect, their character, their souls. The facts on the ground point to one conclusion: get out now.

Change your attitude, change your life. We're very good at explaining why we're unhappy: bad job, bad relationships, bad luck. But there's probably a better reason: bad attitudes. In Lord, Change My Attitude, James MacDonald shows us just how much our attitudes affect our lives. One of his bestsellers, this book is classic James: It's clear, it's inspiring, and it packs a punch. Drawing from the experience of the Israelites who grumbled through the wilderness, MacDonald shows how bad attitudes rob us of joy. Coveting, complaining, and being critical are not what our hearts were made for. They were made for thankfulness, contentment, and love. Is your heart straining under the weight of a bad attitude? Don't read this book if you're looking for a quick fix. Don't read this book if you're unwilling to change. Read it if you're ready for a serious, inside-out attitude adjustment.

The world is full of problems and conflicts. So why can we not solve them? According to Edward de Bono, world thinking cannot solve world problems because world thinking is itself the problem. And this is getting worse: we are so accustomed to readily available information online that we search immediately for the answers rather than thinking about them. Our minds function like trying to drive a car using only one wheel. There's nothing wrong with that one wheel - conventional thinking - but we could all get a lot further if we used all four. De Bono examines why we think the way we do from a historical perspective and uses some of his famous thinking techniques, such as lateral thinking, combined with new ideas to show us how to change the way we think. If we strengthen our ability and raise our thinking level, other areas of our life - both personal and business success - will improve. De Bono is the master of the original big 'concept' book and his enticement to us to use our minds as constructively as possible should appeal to a whole new generation of fans.

A highly anticipated collection, from the writer Maggie Nelson has called, "bracingly goodrefreshing and welcome," that explores the myriad ways in which desire and commodification intersect. From graffiti gangs and Grand Theft Auto to sugar daddies, Schopenhauer, and a deadly game of Russian roulette, in these essays, Chelsea Hodson probes her own desires to examine where the physical and the proprietary collide. She asks what our privacy, our intimacy, and our own bodies are worth in the increasingly digital world of liking, linking, and sharing. Starting with Hodson's own work experience, which ranges from the mundane to the

Both tender and jarring, this collection is relevant to anyone who's ever searched for what the self is worth. Hodson's accumulation within each piece is purposeful, and her prose vivid, clear, and sometimes even shocking, as she explores the wonderful and strange forms of desire. *Tonight I'm Someone Else* is a fresh, poetic debut from an exciting emerging voice, in which Hodson asks, "How much can a body endure?" And the resounding answer: "Almost everything."

What we can learn from the aftermath of cybersecurity breaches and how we can do a better job protecting online data. Cybersecurity incidents make the news with startling regularity. Each breach—the theft of 145.5 million Americans' information from Equifax, for example, or the Russian government's theft of National Security Agency documents, or the Sony Pictures data dump—makes headlines, inspires panic, instigates lawsuits, and is then forgotten. The cycle of alarm and amnesia continues with the next attack, and the one after that. In this book, cybersecurity expert Josephine Wolff argues that we shouldn't forget about these incidents, we should investigate their trajectory, from technology flaws to reparations for harm done to their impact on future security measures. We can learn valuable lessons in the aftermath of cybersecurity

breaches. Wolff describes a series of significant cybersecurity incidents between 2005 and 2015, mapping the entire life cycle of each breach in order to identify opportunities for defensive intervention. She outlines three types of motives underlying these attacks—financial gain, espionage, and public humiliation of the victims—that have remained consistent through a decade of cyberattacks, offers examples of each, and analyzes the emergence of different attack patterns. The enormous TJX breach in 2006, for instance, set the pattern for a series of payment card fraud incidents that led to identity fraud and extortion; the Chinese army conducted cyberespionage campaigns directed at U.S.-based companies from 2006 to 2014, sparking debate about the distinction between economic and political espionage; and the 2014 breach of the Ashley Madison website was aimed at reputations rather than bank accounts.

At the present time there are 5.3 million people in the U.S. living with Alzheimers, and by 2010 nearly half a million new cases will be added each year. Data indicate that 70% of Alzheimers patients are cared for at home. Current studies of Alzheimers raise the possibility that early life traumas may be influential in the development of the disease. There is evidence that chronic psychological stress is associated with a nearly three fold increased risk of the illness. Family members and caregivers of Alzheimers patients, health professionals, and all who are concerned about the dramatic increase of the illness are interested in information which brings a greater depth to understanding those afflicted with Alzheimers. This book is autobiographical, and thus becomes an Alzheimers story. It is the story of an emotionally isolated childhood, an unproductive education, and an unhappy first marriage. My deliverance came in the sustaining love of a second marriage and a rewarding life with my psychiatrist husband. But now I have an illness that threatens the life restored and attempts to pummel me back into the depths of those earlier years. Since the onset of Alzheimers six years ago, the memories of my early years now return not just as thoughts but as feelings, and they leave a defining imprint on the symptoms of my Alzheimers. These symptoms include unreasoned resentment, desperate feelings of isolation, periods of profound embarrassment and humiliation, inexplicable and uncontrollable anger, recurring perceptions of personal guilt and inadequacy. All of these currently darken my days and threaten my desire to live. These are the same emotions that colored the earlier years of my life. Now the raging emotions return, and the

emotional incontinence of Alzheimers puts my peace, my love, indeed my life once again in jeopardy.

In *It's Too Late Now: The Autobiography of a Writer*, A. A. Milne, with his characteristic self-deprecating humour, recalls a blissfully happy childhood in the company of his brothers and writes with touching affection about his father whom he adored. From Westminster School he won a scholarship to Cambridge University where he edited the university magazine, *Granta*. He then went out into the world, determined to be a writer. He was assistant editor at *Punch Magazine* and enjoyed great success with his novels, plays and stories. And of course he is best remembered for his children's novels and verses featuring Winnie the Pooh and Christopher Robin. This is both an account of how a writer was formed and a charming period piece on literary life – Milne met countless famous authors including H. G. Wells, J.M. Barrie of Peter Pan fame and Rudyard Kipling.

NAMED A BEST BOOK OF 2017 BY NPR "For anyone facing dementia, [Saunders'] words are truly enlightening. Inspiring lessons about living and thriving with dementia."---Maria Shriver, NBC's Today Show A "courageous and singular book" (Andrew Solomon), Memory's Last Breath is an unsparing, beautifully written memoir--"an intimate, revealing account of living with dementia" (Shelf Awareness). Based on the "field notes" she keeps in her journal, Memory's Last Breath is Gerda Saunders' astonishing window into a life distorted by dementia. She writes about shopping trips cut short by unintentional shoplifting, car journeys derailed when she loses her bearings, and the embarrassment of forgetting what she has just said to a room of colleagues. Coping with the complications of losing short-term memory, Saunders, a former university professor, nonetheless embarks on a personal investigation of the brain and its mysteries, examining science and literature, and immersing herself in vivid memories of her childhood in South Africa.
