Bridgmans Life Drawing

Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

The Devil's Chariots

The Knight and the Dove

This fascinating and well-researched story of the design and production of the first British tanks begins with schemes hatched in the mid-19th century and continues through these military vehicles' baptism by fire on the muddy fields of World War I. Illustrated with archival photographs from the Tank Museum in Bovington, England.

An Illustrated History of Farm Implements

Tissue Engineering

A social history of British women's brave yet forgotten service during WWI from a historian of female wartime experiences—includes photos. At the outbreak of World War I, women looking to contribute to the Allied effort were told by the war office to "go home and sit still." Thankfully, hundreds of thousands of women from all corners of society ignored that advice and lent their collective strength to the cause. In *We Also Served*, Vivien Newman digs beneath the myths surrounding women's war efforts to reveal stories of determination and heroism. Becoming nurses, munitions workers, members of the Land Army, ambulance drivers, and surgeons, women stepped readily into a world normally occupied by men. Some

served with the Armed Forces, others funded and managed their own hospitals within sight and sound of the guns. At least one British woman bore arms, and over a thousand women lost their lives as a direct result of their involvement with the war. This profoundly important history by an expert in female wartime experiences lets these all but forgotten voices finally be heard. "A short book rich in facts and personal testimonies." —Historical Novel Society

Thirty years of hunting them down and collecting has resulted in one of the most impressive early bike collections in the world. It includes 160 pre-1900 bicycles, including hobby horses, boneshakers and Penny Farthings, as well as early 20th-century models. The collection charts the development of the bicycle, which foreshadows the invention of the motor car in

many surprising ways. It also shows wider social change and the role the bicycle has played in female emancipation, war and its progression from plaything of the wealthy to utilitarian mode of transport of the masses.

Prof. Richard Holmes 'Fascinating. Excellent pictures and a readable text as well. A wonderful story well told.' Military Illustrated 'The Devil's Chariots is the best single work on the development, from concept to fielding, of British armour in the First World War Glanfield is also entertaining in addition to

being enlightening The Devil's Chariots is a decent read, and for specialists in the field it will be required reading The research is both broad and solid, and it appears that this will be the last word on this topic for some time to come.' Robert L. Bateman, contributor to The Journal of Military History, Lexington VA, and a member of the Society for Military History 'This book is in a class of its own it brings a new maturity to the study of the tank, most particularly from the human perspective, and best of all, it is very readable'. I greatly enjoyed this evidently well-researched and highly interesting book It taught me much. I am grateful.' I thoroughly recommend this book.' Based on personal recollections and official reports Glanfield uncovers the British tank pioneers and their odd machines, the men who supported the new weapon, those who refused to accept their worth and the brave crews who took them into battle.

Windswept

Stephen Baxter's epic sequence of Xeelee novels was introduced to a new generation of readers with his highly successful quartet, Destiny's Children, published by Gollancz between 2003 and 2006. But the sequence of novels began with RAFT in 1991. From there it built into perhaps the most ambitious fictitious universe ever created. Beginning with the rise and fall of sub-quantum civilisations in the first nano-seconds after the Big Bang and ending with the heat death of the universe billions of years from now the series charts the story of mankind's epic war

against the ancient and unknowable alien race the Xeelee. Along the way it examines questions of physics, the nature of reality, the evolution of mankind and its possible future. It looks not just at the morality of war but at the morality of survival and our place in the universe. This is a landmark in SF.

Something to Hide

Although sometimes enormously destructive, wind is also one of the elements that make life on Earth possible. Without it, the intense solar radiation beating down on the tropics would have no way of escaping. Wind warms the higher latitudes and moderates the equatorial regions, and carries evaporated moisture from oceans to land, where the moisture descends as rain. Wind sculpted the rivers that nurtured the earliest of human civilizations. Even hurricanes are an essential part of the planet's self-regulatory system. Windswept is the story of humankind's long struggle to understand wind and weather—from the wind gods of ancient times to early discoveries of the dynamics of air movement to high-tech schemes to control hurricanes. Marq de Villiers is equally adept at explaining the science of wind as he is at presenting dramatic personal stories of encounters with gales and storms. Running through his narrative is the dramatic story of Hurricane Ivan, the only storm on record to three times reach Category 5 status (sustaining winds greater than 155 miles per hour) in its path of death and destruction from the Sahara to North America, where it traveled from Texas to Newfoundland. We have made great strides in understanding how wind affects weather, but much is left to learn about how global warming and pollution may impact the winds themselves. The stakes are high because, as Hurricane Katrina so vividly reminded us, anything that affects the winds eventually affects human life.
