## Welcome To 2nd Grade Student Planner

Samuel Lebrun is a 15-year-old boy born in Canada who now lives in California with his Mexican father. His pregnant French mother and his unborn brother died in a car accident when he was just 7 years old. Samuel is good with numbers and is also able to speak English, French, and Spanish, but he is special because of something else: he often has precognitive dreams. He doesn't know how to control them or when he will have one, but they warn him about upcoming dangers. The problem with these dreams is that they always manifest themselves in the form of allegories, so at times, it's really hard for the boy to understand what they mean until it is already too late. Right on the day when he starts to study at Derphen International High School, there is an explosion in one of the hallways he was about to enter. Later on, he will discover that the explosion was meant to kill him and his friends, but since the goal was not achieved, they will suffer a series of mysterious accidents that will attempt to end their lives. With the help of his British friend John Williams, his French-American friend Edward Thompson, and his Japanese-American friend Hiyori Tsukishiro, Samuel will have to find out who is causing these accidents—that keep occurring during their semester abroad in Paris—before the culprit manages to murder him or his loved ones. Who is behind the accidents? Why do they want to kill them? Will Samuel and his friends manage to escape from all the accidents? Join the four friends in the first part of the trilogy that will eventually take you all over the world!

### **All Welcome Here**

Children spend more time at school than anywhere else except home; thus, schools can have a major effect on children's health by providing a healthy physical environment, serving meals and snacks built around sound nutritional guidelines,

and teaching about health, as well as modeling and promoting healthy behaviors. School health services programs involve not only school nurses and focus not only on nursing practice, standards, and performance issues; they also include services and classes to teach students the information and skills they need to become health-literate, to maintain and improve their health, to prevent disease, and to reduce risky behaviors impacting health. School nurses, teachers, administrators, health coordinators, guidance counselors and social workers all join with parents in safeguarding and promoting the health and well-being of school-aged children as a basic foundation for academic success. The Encyclopedia of School Health offers quick access to health and wellness information most relevant to children in America's K-12 school setting. You'll find valuable guidance on developmental stages, acute and chronic illnesses, special education, nutrition, crisis response, prevention, and more.
