One of Fuller's most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future. Description by Lars Muller Publishers, courtesy of The Estate of Buckminster Fuller

Ptolemy's Almagest is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

First published in 1898, this is a very different astrology book from what we have now. There are extensive delineations for the signs of the zodiac, especially when found on the ascendant. There are delineations of planets in signs when they are in the first house or are the chart ruler, in both cases, describing the physical appearance. There are delineations of planets in the various houses, which will also serve for the planetary rulerships of the houses. There are only sketchy notes on aspects. So far as the "pure astrology" of planets in signs, in houses, in aspect, there is almost nothing at all. The reason is found in the second part of the book. We are not reading the chart as a psychological abstraction. We are, instead, looking for specific traits, attempting to answer specific questions. Will we have a profession? What kind of marriage? What kind of children? Will we vanquish our enemies, or submit to them? What kind of illness? We then find the house(s) of the horoscope which rule the question, and then delineate the signs & planets we find there. These are, by the way, the sort of questions that clients would ask, if they only knew we could give answers! The sort of things that astrologers themselves want to know. In the process we learn how to read a chart & get real meaning from it. We get ideas from one section and then apply them to other sections. There are hundreds and hundreds of useful aphorisms, except that Sepharial doesn't label them as such. Get this book, study it, underline key passages, scribble in the margins. You will learn more from this book than most all others put together.

LEO.-Physical marks: Strong, broad shoulders; upright walk, cheerful expression; fearless eyes, generally of a grey tint; wavy hair.Mental qualities: Faithful, proud, fearless; ambitious, generous, artistic; opposed to cliques and secrecy; oblivious to enmity; rich in life and feeling.-from "Signatures of the Zodiac"Do you know what "Bestial Signs" are? Which Zodiac sign is prone to "strange and impulsive love affairs"? Which planet tends to rule those who are "ingenious, reserved, covetous, melancholy, unfortunate"? What the "Law of Sex" is? If not, you need to examine this classic work of traditional astrology, first published in 1898. Four concise books-"Treating of the Language of the Heavens," "The Reading of the Horoscope," "The Measure of Time," and "Hindu Astrology"-impart the basics of reading the stars to determine your destiny."Sepharial" was the pseudonym of British mystic WALTER GORN-OLD (1864-1929), one of the most prolific writers on and teachers of astrology in modern times. Among his many works are Astrology Explained, Cosmic Symbolism, Science of Foreknowledge, and The Silver Key.
