laugh-out-loud-funny, argument with all the unbridled force of her famously wicked intellect. In forty to-the-point, impressively erudite chapters drawing on the realms of history, child psychology, politics, and the environment, Maier effortlessly skewers the idealized notion of parenthood as a natural and beautiful endeavour. Enough with this “baby-mania” that is plaguing modern society, says Maier, it’s nothing but brainwashing. Are you prepared to give up your free time, dinners with friends, spontaneous romantic getaways, and even the luxury of uninterrupted thought for the “vicious little dwarves” that will treat you like their servant, cost you hundreds of thousands of dollars, and end up resenting you? Speaking to the still “child-free”, to fellow suffering parents, and to adamant procreationists alike, *No Kids* is a controversial, thought-provoking, and undeniably entertaining read. Reasons to avoid having kids: •You will lose touch with your friends •Your sex life will be over •Children cost a fortune •Child-rearing is endless drudgery •Vacations will be nightmares •You’ll lose your identity and become just “mom” or “dad” •Your children will become mindless drones of capitalism •The planet’s already overcrowded •Your children will inevitably disappoint you From the Trade Paperback edition.

### **When Good Kids Go Bad**

The 21 poems in this collection were influenced by the work of many, including Neruda and Tagore, the nature poems of Galway Kinnell and Jim Harrison, and the modernist poets Hart Crane, Rainer Maria Rilke, Wallace Stevens, and William Carlos Williams. It is perhaps Williams most of all whose imagist aesthetic infuses the poems. I've always liked the Zenlike attention he gives to the real, ordinary things of the world, so that in essence, they become extraordinary, a part of the reader's imagination. The poems can be divided up thematically into Cape Cod poems, fishing poems, New England nature poems, and spiritual pieces. Most of them came quite spontaneously and I let the words arrange themselves on the white tundra of my notebook pages with little thought of form; later, I tried to find the internal music, sense, and rhythm in each, adhering to Williams dictum that a poem is a little universe. In a sense each is an unfinished fragment, not wholeness itself but a search for wholeness and form. The first story, "Tracks of the Beleaguered" emerged after a two or three year gestation period not unusual for my process. I had been wanting to write a Vermont story for some time, one that would include a veteran of World War II tracking a wounded whitetail deer high up a

mountain. I wanted the buck to embody the soul of the Green Mountains wild, primordial unchanged by technology and industry. Elisha represents the wounded modern exile, seeking a higher and more profound sense of identity after the dehumanizing brutality of the Pacific island fighting. I was reading Joseph Campbell's Primitive Mythology around the same time, and came upon a passage about the Buriat of Siberia and how with shamans there is usually a summons, a calling, which begins with a crisis and a dream of being broken apart physically, the discovery of an extra bone, followed by an interfusion of beingness. In a sense, Elisha and the buck become one, seeking sanctuary from the senseless violence and appearance-driven industrialized world. "Billie Holiday at the Atlantic House" is less esoteric and has its origins in trips to Provincetown where I frequently go to write, and where the actual Atlantic House exists on Masonic Street. Billie Holiday really did perform two separate engagements there. This one lived in my imagination for a year or so as well, percolating until all of the elements coalesced and resonated. I liked the idea of having Lucas be a Portuguese fisherman who listened and empathized with the blues and Jazz singer; I liked the innocence and naivet of the storyline. To create a fictive Holiday, I listened to the Verve recordings I own, and went online to listen to rare interviews with her. Like Elisha in the first story, Lucas is somewhat out of step with society, and instead lives a vivid and intense inner life. As in the Vermont story and poems, the natural world predominates, always there for sanctuary, solitude, and transcendent experience. These thematic strands continue in the novella

Whoever We May Be At Last whose title comes from The Ninth Duino Elegy by Rilke. The germ of the story came in a dream I had two years ago, and I spent a summer writing the first draft, watching it take on a life of its own. I wanted the setting to be a relatively small rivertown in Connecticut with a history of industry. I liked the idea of the story being told through five narrators, each having a connection to the central figure, Ian, who's about to enlist in the Marines and fight in Afghanistan. It's difficult for me to talk about this one, since it's more visceral than anything I've written before. I'll let the reader decide on interpretations. In some respects its about the nature of sacrifice, the portrayal of a modern American town coming to terms with loss. Artistically, it seems to represent a living process of the imagination, of trying to piece together a semblance of the truth, and not so much a

## **Dear Ruby Ann**

Read Larry Winget's posts on the Penguin Blog. Straight-talking, bestselling Pitbull of Parenting Larry Winget says "This is not a fix your kid book. It's a fix the way you parent book. You owe it to your kids to parent with a plan!" Being a parent is the toughest job in the world, especially with the increasing number of negative influences and pitfalls facing our kids today, from childhood obesity and out-of-control celebrity culture to the dangers of the internet and credit card debt. Larry Winget has never been one to shy away from tough truths, and what he says here may well be difficult for some parents to swallow: we are in the midst of a crisis with our kids. Kids today are over-indulged, over-entertained, under-achieving, and under-disciplined, with a sense of entitlement that is

crippling society. And the real problem is that parents aren't paying attention to what's going on. If they were they would realize that most kids today barely read and write, except with their thumbs on their cell phones! Well-behaved, respectful kids are the exception, not the rule, and for the most part, parents are to blame. Responsible parenting is about beginning with the end in mind and parenting with a plan. But most parents have never stopped to consider what kind of adult they want to raise. They have all this fun creating a baby, but they don't have a plan for the end product. Larry's message to parents: Teach your kids to become the best adults they can be. But don't expect your kids to improve until you improve. Your Kids Are Your Own Fault covers familiar lessons and principles that have led Larry's readers to greater success with money, career, and goal setting, this time at a level where they can be taught to children. This book shows parents how to design the adult they want their kid to become and work backwards to make sure it happens. Kids don't come with an instruction manual, but finally being a parent does! ## **When Good Kids Do Bad Things**

A collection of devotions for each day of the calendar year, including readings, illustrative stories, memory verses, and questions to internalize the messages.

## **Good Kids**

More than a tool to correct bad behavior, this handbook urges parents to move beyond typical discipline techniques by creating an environment based on mutual respect, emotional safety, and positive, open communication. The seven outlined principles redefine the parent-dominated family by teaching parents how to achieve mutual parent/child respect without being submissive, set firm limits without using demands or coercion, and empower children to open up, cooperate, and realize their own innate potential. Based on Marshall Rosenberg's Nonviolent Communication process, the framework helps parents break down the barriers to outstanding

relationships with their kids by avoiding destructive language and habits that keep parents and children from understanding one another. Activities, stories, and resources help parents immediately apply the seven keys to any parenting situation.

Some men seem to have all the luck. Others dream of only finding a little. Richard Smiths world was the orphanage. It was the only one he knew. All of the other worlds for children, of mothers and fathers and a place called home, he learned from the tears of those who had lost theirs only to wind up in his. From the way they grieved, he knew it must have been something pretty great. Once he had two sisters, they said. One had died and the other went to a place called Iowa with an uncle. He was left behind. He grew up to put most of it behind him and in his search for a family of his own, thought that he had. But an electrical shock opened some door to his early childhood he couldnt seem to get closed again. Each discovery posed more questions until finally there was only one other person he needed to see. It would be a three-day road trip, or so he thought

## **Words Kids Need to Hear**

Nature didn't finish your child's brain at birth. It's up to you to maximize your child's mental skills without causing additional stress. Acclaimed neurologist and bestselling author of Grain Brain, David Perlmutter,

MD, offers these valuable tools: Simple games to reinforce memory pathways in the brain Information on common household products and children's toys that contain brain-damaging neurotoxins The right foods and supplements to boost intelligence and turn on your child's smart genes How to turn the television, the computer, and video games into educational tools Proven ways to reduce the risk of your child developing ADD and ADHD Between birth and age five, your child has up to thirty IQ points at stake. Scientists now know that the human brain is undergoing a constant and dramatic transformation in the first years of life. During this peak time of development, every activity and experience leaves an indelible mark on your baby's brain, for better or worse. The right kind of stimulation and nutrition will create connections in the brain that promote intelligence and raise IQ. The wrong kinds of activities and foods can stifle intellectual development, destroy brain cells, and leave your child more vulnerable to learning or behavior problems down the road. So, what can you do during the first five years to ensure that your child is primed to excel? The good news is that raising a smarter child is easier than you think. It doesn't require making an investment in expensive equipment or high priced tutors. It's as simple as playing the right games, serving the right foods, and maintaining a brain-enhancing environment in your home by eliminating common household toxins. In *Raise a Smarter Child by Kindergarten* by Dr. David Perlmutter, you'll learn easy and highly effective strategies that can vastly improve your child's brain power and reduce his or her chances of developing ADD and ADHD. For example, you can: Stimulate

Memory: Changing a component on the over-the-crib mobile every week makes the baby compare what was there before to what's there now, reinforcing memory pathways in the brain that are critical for learning. Spread out those shots: Schedule more frequent trips to the pediatrician for vaccinations, so that fewer shots are administered at once. Flooding the immune system with a cocktail of different vaccines can damage the nervous system. Get rid of toxins: Protecting a child from neurotoxins found in foods, toys and even baby bottles can help preserve precious IQ points. Inside, Dr. Perlmutter provides a scientifically backed food and supplement plan for children and nursing mothers and details the many brain-building activities that you can do with your child. In addition, he reveals the numerous toys and household products that contain harmful, brain-damaging toxins and shows how to identify and combat common childhood problems like ADD and food allergies that may affect your child's development. Your job over the first five years is to help your child build the best brain possible. With Dr. Perlmutter's help, you can mine the countless opportunities you have each day to make your child smarter, happier and better prepared to excel.

According to a study by George Barna, a person is most likely to become a Christian between the ages of four and fourteen. Yet the majority of evangelism training is designed to reach adults, not children. Leading Kids to Jesus equips children's ministry leaders with proven principles to help them have life-changing discussions with kids. The focus is exclusively on personal interactions, not corporate presentations or prop-driven illustrations. Readers learn the best ways to communicate God's love to toddlers, preschoolers, and elementary school children in words they understand. The book adapts two simple communication tools from the bestselling evangelism course *Becoming a Contagious Christian*, which helps you develop your own three-part story and the four components of the gospel message. Included is a survey of what questions to expect from kids, along with other helps and children's ministry experience from Willow Creek's Promiseland staff and volunteers. A companion volume for parents called *Leading Your Child to Jesus* is also available.

## **Worlds**

Parents all over the world have certain universal aspirations. They want their children to contribute meaningfully to society and to pursue their own

dreams. But we appear to be missing the essentials. In this inspiring book, based on 30 years of research and practice, Dr. Stanley Greenspan redefines the qualities of an emotionally and intellectually healthy child and identifies the ways that parents can help their children develop each quality. The qualities that make us call a child a "great kid," such as empathy, curiosity, and logical thinking, are fundamental and underlie all the academic, athletic, and social talents that a child might develop. We are not born with these traits, Greenspan demonstrates, they come from experience, which suggests that each and every parent can encourage them and that each and every child can strive to acquire them.

When football coach Tiger Ellison was faced with his first losing season ever, he had to muster all the creative will he had acquired since childhood to turn the season around. In doing so, he invented the most wide-open, productive, fan-pleasing scheme of aerial football the game had ever seen! He shared his philosophy with the coaching world in 1965, by writing a book called Run and Shoot Football: Offense of the Future. His dramatic offense changed the way football has been played ever since, all the way from the Little Leagues to the NFL. But this story transcends football, taking place during the social turbulence of the 20th Century. As educator and

coach, Tiger dedicated his life to tapping into the fighting spirit of each of his youngsters, regardless of race, creed, or social status. He challenged each to build the character, confidence and courage to pursue a noble cause, in the classroom, on the gridiron of American football, and in life. It is a poignant reminder of the power each of us has within us to become a real winner. Tiger Ellison had a passion for life, country and sport that were absolutely contagious for those around him. When you read his story, you may laugh a little, you may learn some things about football strategy, but I am certain you will love Tiger as we players did and see why his positive philosophy of life influenced all of us in a very special way. Dr. Rex Kern, President, MSB Financial, United Midwest Savings Bank; 1968 Buckeye National Championship Quarterback and 1969 Rose Bowl MVP; Member of The Rose Bowl Hall of Fame This is one football story that is not about power and money, rather a powerful and creative mind that left its imprint forever on players, coaches, and modern offensive football. At a time when football has become big business, Tigers philosophy will remind us all why we love the game, what we can learn from it, and who we can become by it. It begins with lunches and continues with regular invitations to meals with Sheba's seemingly close-knit family. But as Barbara and Sheba's relationship develops, another does as well: Sheba has begun a passionate affair with an underage male student. When it comes to light and Sheba falls prey to the inevitable media circus, Barbara decides to write an account in her friend's defense—an account that reveals not only Sheba's secrets but her own. *What Was She Thinking?* is a story of repression and passion, envy and complacency, friendship and loneliness. A complex psychological portrait framed as a wicked satire, it is by turns funny, poignant, and sinister. With it, Zoë Heller surpasses the promise of her critically acclaimed first novel, *Everything You Know*. Shortlisted for the Man Booker Prize *What Was She Thinking?* is the basis of the 2006 film, *Notes on a Scandal*, starring Judi Dench and Kate Blanchett.
