this world. What can you do now so that when you are done with your training and ready to do God's work, you still want to? From the author: Before you jump on the medical school bandwagon, the four-year, one-hundred-thousand dollar question you should ask is, "Is it all worth it?" The revolutionary approach to smart thinking. In a rapidly changing world there is an increasing need for critical, creative, and systems thinking. These abilities, though, are only gained through a virtuous circle of trying, reflecting, learning, and trying again; despite this, most organizations are still trying to develop these skills through linear approaches. The Thinking Effect by Michael Vaughan redefines smart thinking and effective learning - teaching how rather

than what to think. Vaughan has spent his career teaching smart thinking to Fortune 500 companies and government agencies around the globe. By adopting this new thinking, leaders will learn how to develop "neural leadership" - understanding and engaging with the psychology of their team - while employees at all levels will learn how to: develop patterns of thought that differentiate top performers from those who merely do their jobs, increase productivity, improve problem-solving, and influence profitability, and become Value Workers who generate value for growth and a sustainable future. The Thinking Effect offers learning solutions, individual practices, and real-world applications to help companies break free from institutional processes that hinder fresh and innovative thought. The result is an engaged, valuable workforce that rethinks established practices - and thinking itself.
