Enjoy a (slow) spin around the old rink in the only history of the world-famous Zamboni ice resurfacers...now available in an updated edition to celebrate the 70th birthday of these iconic machines! Until 1949, resurfacing an ice rink required an ungainly tractor-pulled shaver followed by three or four workers scooping away the shavings and then spraying and squeegeeing water. The process—including the refreezing—took more than an hour, as skaters or hockey players waited patiently.
